The Use of Digital Radar in Short-range Forecasting Jan 29 2022 As part of a program to improve short-range forecasts of weather conditions at aircraft terminals, a digital radar system was established at Air Force Geophysics Laboratory, Bedford Mass. The system, consisting of AN/FPS-77, digital interface, microwave transmitter-receiver, video integrator and computer, was installed in late 1972. Since that time the system has been used in conjunction with a network of 26 automated weather stations to make experimental forecasts of visibility and severe-weather conditions. The

radar output of digital maps of radar intensity was found to be very convenient, but the inability of the radar to detect small water droplets limits the use in low visibility forecasting primarily to heavy rain storms and snow storms. In severe storms modest success was attained forecasting gusts, using digital maps. The large amounts of weather information from the network and radar frequently saturated the forecaster making forecasts at 15-min intervals, and relief was sought in the form of objective aids. Preliminary relationships between radar intensity, extinction coefficient (visibility) and rainfall rate have been formulated. In addition, a technique was developed using digital radar maps to obtain motion vectors and make probability forecasts of severe weather conditions. The calibration procedure relies on intensity of ground targets (hills and towers) for day-to-day relative calibration, and absolute calibration has been limited to Z-R relations. (Author).

Digitale Markenführung May 01 2022 Dieses Buch verfolgt einen ganzheitlichen, on- und offline-übergreifenden Markenführungsansatz und erläutert, warum die Verantwortung für eine langfristige und werthaltige Entwicklung der Marke bei den Entscheidern im Unternehmen bleibt. Das Konzept der Markenführung hat sich durch die Digitalisierung grundlegend geändert. Um Marken erfolgreich zu führen, müssen neue, digitale Gestaltungsfelder genutzt werden. Die Marke kann heute viel schneller, innovativer und persönlicher agieren. Dabei gilt es, Anregungen, Wünsche und Ideen der aktiven Brand-Community aufzunehmen und in die Entscheidungsprozesse des Managements zu integrieren. Wie das gelingen kann, wird anhand von Beispielen und konkreten Case Studys erläutert. Durch eine integrative Markenführung wird im Idealfall eines erreicht: (Digital) Customer Delight! Vor diesem Hintergrund sind die folgenden Handlungsfelder auszugestalten: Customer-Experience-Management Customer-Engagement und User-Generated Content Content-Marketing Rating- und Review-Management Influencer-Marketing Eco-Systems Sharing Economy Ein wichtiges Buch, das interessante Fragen aufwirft und neue Perspektiven auf die digitale Markenführung ermöglicht. Die relevanten Handlungsfelder werden fundiert und praxisnah diskutiert. Prof. Dr. Holger J. Schmidt, Hochschule Koblenz Lesen, lernen, loslegen. Ralf T. Kreutzer und Karl-Heinz Land zeigen, wie man im digitalen Zeitalter Marken richtig führt. Prof. Dr. Karsten Kilian, Markenlexikon.com
