The Blended Course Design Workbook Jun 29 2022 Blended (also called hybrid) classrooms, in which face-to-face interaction is intentionally combined with online activities to aid student learning, are becoming more and more common. Most recently, "flipped" classrooms have become a popular method for teaching because more time for active learning in-class can be gained by moving content delivery such as lecture to outside-of-class homework using technology tools such as video or lecture capture. The blended model is proving to be an environment that provides more self-directed, technology-mediated learning experiences for students who will be incorporating technology more and more into their professional lives post-college. The Blended Course Design Workbook meets the need for a user-friendly resource that provides faculty members and administrators with instructions, activities, tools, templates, and deadlines to guide them

through the process of revising their traditional face-to-face course into a blended format. Providing a step-by-step course design process that emphasizes active learning and student engagement, this book will help instructors adapt traditional face-to-face courses to a blended environment by guiding them through the development of course goals and learning objectives, assignments, assessments, and student support mechanisms with technology integration in mind. It will also help instructors choose the right technologies based on an instructor's comfort level with technology and their specific pedagogical needs. The book will help each instructor who uses the text to develop a unique course by making choices about their course design based on student learning needs for their chosen topic and discipline. Every component of the workbook has been piloted with faculty designing and implementing blended courses and then revised to better meet the needs of faculty across a range of comfort levels with technology use. The Blended Course Design Workbook includes detailed instructions for each stage of course design alongside specific activities that the reader can complete. The book is unique because it facilitates a step-by-step process for blended course design with specific templates and tools that can be used across disciplines. Additional resources and handouts are posted on the book page as well as the author website, a
