Unjust Enrichment in South African Law Jun 04 2022 Conventional thinking teaches that the absence of liability - in particular contractual invalidity - is itself the reason for the restitution of transfers in the South African law of unjustified enrichment. However, this book argues that while the absence of a relationship of indebtedness is a necessary condition for restitution in such cases, it is not a sufficient condition. The book takes as its focus those instances in which the invalidity thesis is strongest, namely, those traditionally classified as instances of the *condictio indebiti*, the claim to recover undue transfers. It seeks to demonstrate that in all such instances it is necessary for the plaintiff to show not only the absence of his liability to transfer but also a specific reason for restitution, such as mistake, compulsion or incapacity. Furthermore, this book explores the reasons for the rise of unjust factors in South African law, attributing this development in part to the influence of the Roman-Dutch *restitutio in integrum*, an extraordinary, equitable remedy that has historically operated independently of the established enrichment remedies of the civilian tradition, and which even now remains imperfectly integrated into the substantive law of enrichment. Finally, the book seeks to defend in principled terms the mixed approach to enrichment by transfer (an approach based both on unjust factors and on the absence of a legal ground) which appears to characterise modern South African law. It advocates the rationalisation of the causes of action comprised within the *condictio indebiti*, many of which are subject to additional historically-determined requirements, in light of this mixed analysis.

Exploring Animal Behavior in Laboratory and Field Nov 09 2022 Exploring Animal Behavior in Laboratory and Field, Second Edition provides a comprehensive manual on animal behavior lab activities. This new edition brings together basic research and methods, presenting applications and problem-solving techniques. It provides all the details to successfully run designed activities while also offering flexibility and ease in setup. The exercises in this volume address animal behavior at all levels, describing behavior, theory, application and communication. Each lab provides details on how to successfully run the activity while also offering flexibility to instructors. This is an important resource for students educators, researchers and practitioners who want to explore and study animal behavior. The field of animal behavior has changed dramatically in the past 15 - 20 years, including a greater use and availability of technology and statistical analysis. In addition, animal behavior has taken on a more applied role in the last decade, with a greater emphasis on conservation and applied behavior, hence the necessity for new resources on the topic. Offers an up-to-date representation of animal behavior Examines ethics and approvals for the study of vertebrate animals Includes contributions from a large field of expertise in the Animal Behavior Society Provides a flexible resource that can be used as a laboratory manual or in a flipped classroom setting

Principles of Organic Coatings and Finishing Jun 11 2020 This book provides an accessible way to learn about organic coatings and finishing. The coating materials are considered here from the angle of chemical reactions and mechanisms of film formation. The examples and exercises provided in here will also help the reader achieve technical insights into the subject and obtain a deep understanding of the principles underlying the technology. This book also provides the reader with the basic knowledge and skills required for handling mixtures. As rheological technology has been widely used in research papers for academic exchange and solving technical problems on organic coatings and finishing, this book collects and compiles a number of reference works on rheological technology, demonstrating how to use it in organic coatings and finishing.

Pushkin ' s Rhyming Jun 23 2021 The culmination of four decades of work by J. Thomas Shaw, this fully searchable e-book carefully analyzes, both chronologically and by genre, Alexander Pushkin ' s use of rhyme to show how meaning shifts in tandem with formal changes. Comparing Pushkin ' s poetry with that of Konstantin Nikolaevich Batiushkov (1787–1855) and Evgeny Abramovich Baratynsky (1800–1844), Shaw considers, among other topics, what is exact and inexact in " exact " rhyme, how the grammatical characteristics of rhymewords affect the reader ' s perception of the poem and its rhyme, and how the repetition of a rhyming word can also change meaning. Each of the five chapters analyzes in detail a distinct aspect of rhyme and provides rich resources for future scholars in the accompanying tables of data. The extensive back matter in the book includes a glossary, abbreviations list, bibliography, and indexes of poems cited, names, and rhyme types and analyses.

One Thousand Questions and Answers on Jewels of Knowledge and Trivia Mar 21 2021 The following are questions on important subjects intended to help people use their memory in order to retrieve information on subjects they know such as History, Geography, Religion, Science and more trivia and curiosity questions will also be included. This project will be divided into ten chapters with 100 questions for each chapter. The questions represent the first part of the book. The second part of the book includes the answers. Unlike in the Jeopardy Show, which is designed for a new champions, this project is for everyone. No one is required to gamble or play for money. No one is required to pull hair in order to find answers which may not always be so important or indispensable for everyone in real life. It is intended to entertain and to enrich knowledge. Some questions may pertain to one or more subjects or chapters. For example, questions on the Patriarch Abraham, could be found in the chapter on ancient history as well as in the chapter on the Bible. Questions on quotes may pertain to ancient history and scriptures as well as in contemporary writers/scientists. The questions and statements given here are of public domain and are not questions or statements uniquely or specifically made by any educational institution. However, credit is given when due. The answers will be given at the end of the book, so people can use their memory and knowledge before they look for the answer. The author has consulted and researched dozens of books and hundreds of internet sources as written in his bibliography. Some of the answers may be found in books he had previously published, namely The Bible, The Power of the Word (and in between the lines); The Quran and Biblical Origins; One Family, Four Cultures and Four Continents; Whose God is it Anyway?; Love and Romance in the Bible. Those books can be viewed at the following sites: www.amazon.com, www.asherauthor.com, www.xlibris.com and www.lulu.com (click on authors name) The purpose of this work is to have people enjoy daily a few moments of fun. The contents are not in any chronological order. This is not a fiction or drama book that needs to be finished at the end of the day. This will not only be fun to test ones knowledge, but also an excellent tool to sharpen and refresh the mind on different fields of knowledge. In sum, is it important to state that rediscovering old and new facts and data can lead to a certain happiness and personal satisfaction. Knowledge on diverse subjects can help in achieving better self-confidence and self-expression and, overall, a better quality of life for all people. This project has something for everyone. The questions and answers will undoubtedly satisfy readers of all walks of life and of most age groups. Facts, data and world events become so complex that this project. Finally, this project has been inspired by personal experience as it is explained at the end of this book under the title References and Bibliography.

Creativity and Technology in Mathematics Education Aug 14 2020 This volume provides new insights on creativity while focusing on innovative methodological approaches in research and practice of integrating technological tools and environments in mathematics teaching and learning. This work is being built on the discussions at the mini-symposium on Creativity and Technology at the International Conference on Mathematical Creativity and Giftedness (ICMCG) in Denver, USA (2014), and other contributions to the topic. The book emphasizes a diversity of views, a variety of contexts, angles and cultures of thought, as well as mathematical and educational practices. The authors of each chapter explore the potential of technology to foster creative and divergent

mathematical thinking, problem solving and problem posing, creative use of dynamic, multimodal and interactive software by teachers and learners, as well as other digital media and tools while widening and enriching transdisciplinary and interdisciplinary connections in mathematics classroom. Along with groundbreaking innovative approaches, the book aims to provide researchers and practitioners with new paths for diversification of opportunities for all students to become more creative and innovative mathematics learners. A framework for dynamic learning conditions of leveraging mathematical creativity with technology is an outcome of the book as well.
