Lotus Europa - Colin Chapman's mid-engined masterpiece Jul 08 2020 The Lotus Europa was Colin Chapman and Lotus's first mid-engined road car, and was produced from 1966 through to 1975. Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars.

*Daimler V8 S.P. 250* Dec 01 2019 Today very much part of the classic car scene around the world, the Daimler SP250 sports car has a fascinating and eventful history. The idea of staid and traditional Daimler building an open sports car is surprising enough in itself: that the car should be fiberglass-bodied, V8 engined and have a daring futuristic appearance stretches credibility to the limit...but that's exactly what the company did produce between 1959 and 1964. A bold new design, the "Dart" as it was originally to be called, should have been struggling Daimler's savior and a springboard to a range of new models, including saloons and coupes.

Things didn't quite work out that way and Daimler was acquired by Jaguar, which led to the SP250's Edward Turner-designed V8 engine being used in a Daimler-badged version of the Jaguar MkII saloon. Here is the full story of the SP250 including concept, development and production history. Also covered are related models, specials, buying and restoration, chassis numbers, production numbers, color schemes, clubs and specialists. Altogether a source book of essential information for SP250 and Daimler enthusiasts.

*Porsche 356* Oct 30 2019 The 356 was the first Porsche model. The coupes and spyders were a great success throughout the world and continued to be so throughout the model's life. **Mazda MX-5 Miata** Mar 04 2020 Twenty years ago, the Mazda MX-5 Roadster was born - the result of five years' research and development by two project teams split across Japan and the USA. When launched, it was the sports car the world was waiting for. Over the past 20 years, the MX-5 has evolved and changed, but has managed to stay true to the original philosophy of 'horse and rider as one,' a car to truly engage with the driver and provide the ultimate top-down driving experience with its perfect 50/50 weight distribution and neutral handling - it is easy to control, nimble and light, and inexpensive to buy, own and maintain. The MX-5 is a true testament to itself as the 'world's best-selling sports car,' and with the earlier MkI and MkII available for modest prices, it is the perfect choice as a fun and enjoyable daily driver, a weekend track car, or a project base for a kit car. This book will help you get the MX-5 of your dreams.

That situation has thankfully changed, and Capri values are rising rapidly This guide takes the potential purchaser through a short initial examination to weed out the obviously defective followed by a more comprehensive step by step look at the body and mechanical parts with jargon-free text accompanied by over 100 photographs. A unique points marking system ensures that nothing is overlooked.
