Collected Papers in Theoretical Economics (Volume V): Economic Policy and Its Theoretical Bases Jul 01 2022 Effective policymaking is based on economics which is a blend of empiricism as well as theory. It needs to be grounded not only in data, statistics, and the regularities observed therein, but also analytics, deductive reasoning, and logic, which are the constituents of theory. Published during 2009-16, the seven years that Basu spent as a policymaker—first as chief economic adviser to the Government of India and then as chief economist of the World Bank—this volume draws on the work done by empirical economists and is rooted in analytics, even while addressing practical, down-to-earth problems. The papers having a direct bearing on economic policymaking in this quintessential compilation range from topics such as financial regulation, global policy coordination, aspects of the Indian economy like fiscal and monetary policy design, inflation management, food-grain policy and, more generally, the influence of theory on government policymaking. The volume addresses some of the most compelling challenges of our times, from the global financial crisis and sub-prime mortgage breakdown to corruption control and the design of interventions to provide subsidized food to the

disadvantaged segments of society.

Papers in Experimental Economics Oct 24 2021 Vernon L. Smith is the main creator of the burgeoning discipline of experimental economics. This collection of his papers from 1962 to 1988 surveys major developments in the field from early attempts to simulate economic behavior in now classic double oral auction markets through recent studies of industrial organization and decision making. Topics covered include monopoly and oligopoly supply and demand theory under posted pricing, uniform pricing, double continuous auction, and sealed bid-offer auction; hypothetical valuation and market pricing; asset price bubbles; predatory pricing; market contestability and natural monopoly; and the methodology of experimental economics. Taken together, the papers form a history of the study of economics under controlled conditions. Vernon Smith is Regents Professor of Economics at the University of Arizona, and is the author of over 100 articles and books on capital theory, finance, natural resource economics, and experimental economics. He is president of the Public Choice Society and past founding president of the Economic Science Association.

Economic Doctrine and Method Oct 31 2019 Covering Robert Clower's writings over four decades, this collection brings together papers and recent material on economic method and theoretical foundations.

Selected Papers in Logic and Foundations, Didactics, Economics Jun 07 2020 This volume brings together those papers of mine which may be of interest not only to various specialists but also to philosophers. Many of my writings in mathematics were motivated by epistemological considerations; some papers originated in the critique of certain views that at one time dominated the discussions of the Vienna Circle; others grew out of problems in teaching fundamental ideas of mathematics; still others were occasioned by personal relations with economists. Hence a wide range of subjects will be discussed: epistemology, logic, basic concepts of pure and applied mathematics, philosophical ideas resulting from geometric studies, mathematical didactics and, finally, economics. The papers also span a period of more than fifty years. What unifies the various parts of the book is the spirit of searching for the clarification of basic concepts and methods and of articulating hidden ideas and tacit procedures. Part 1 includes papers published about 1930 which expound an idea that Carnap, after a short period of opposition in the Circle, fully adopted; and, under the name "Principle of Tolerance", he eloquently formulated it in great generality in his book, *Logical Foundations of Probability* (1934), through which it was widely disseminated. "The New Logic" in Chapter 1 furthermore includes the first report (1932) to a larger public of Gödel's epochal discovery presented among the great logic results of all time. Chapter 2 is a translation of an often quoted 1930 paper presenting a detailed exposition and critique of intuitionism.

Brookings Papers on Economic Activity Apr 17 2021 For almost thirty years, Brookings Papers on Economic Activity (BPEA) has provided academic and business economists, government officials, and members of the financial and business communities with timely research of current economic issues. The Economics of Agriculture, Volume 1 Apr 05 2020 D. Gale Johnson, one of the world's foremost agricultural economists, has over the last five decades changed the conduct of research on agricultural economics and policy. The papers brought together in *The Economics of Agriculture* reveal the breadth and depth of his influence on the creation of modern agricultural economics. Volume 1 collects for the first time in one source Johnson's most important work. These classic papers explore the consequences of government intervention in United States and world agriculture; the economics of agricultural supply and of rural labor and human capital issues; and the analysis of agricultural productivity in poor countries, including the centrally planned economies of China and Eastern Europe. Models of precise reasoning and powerful empirical research, the papers cover a wide range of topics—from U.S. commodity price policy to the economics of population control and farm policy reform in China. Volume 1 includes a definitive bibliography of Johnson's published writings. Volume 2 presents twenty-two papers by Johnson's former students and colleagues. International in scope, these papers explore themes and topics inspired by Johnson's work, including agricultural policy and U.S. farm prices; European Common Agricultural Policy; and agricultural and rural development in the Third World. Contributors to Volume 2 are David G. Abler, John M. Antle, Richard R. Barichello, Andrew P. Barkley, Karen Brooks, David S. Bullock, Robert E. Evenson, B. Delworth Gardner, Bruce L. Gardner, Dale M. Hoover, Wallace E. Huffman, Paul R. Johnson, Yoav Kislev, Justin Yifu Lin, Yair Mundlak, John Nash, Keijuro Otsuka, Willis Peterson, Todd E. Petzel, Vernon W. Ruttan, Maurice Schiff, G. Edward Schuh, Theodore W. Schultz, James Snyder, Vasant Sukhatme, Daniel A. Sumner, Vinod Thomas, George Tolley, and Alberto Valdes.

Papers on agent based economics Nov 24 2021

The Art of Experimental Economics Dec 26 2021 "Applying experimental methods has become one of the most powerful and versatile ways to obtain economic insights, and experimental economics has especially supported the development of behavioral economics. The Art of Experimental Economics identifies and reviews twenty of the most important papers to have been published in experimental economics in order to highlight the power and methods of this area, and provides many examples of findings in behavioral economics that have extended knowledge in the economics discipline as a whole. Chosen through a combination of citations, recommendations by scholars in the field and voting by members of leading societies, the twenty papers under review - some by Nobel prize-winning economists - run the full gamut of experimental economics from theoretical expositions to applications demonstrating experimental economics in action. Also written by a leading experimental economist, each chapter provides a brief summary of the paper, makes the case for why that paper is one of the top twenty in the field, discusses the use made of the experimental method, and considers related work to provide context for each paper. These reviews quickly expose readers to the breadth of application possibilities and the methodological issues, leaving them with a firm understanding of the legacy of the papers' contributions. This text provides a survey of some of the very best research in experimental and behavioral economics and is a valuable resource for scholars and economics instructors, students seeking to develop capability in applying experimental methods, and economics researchers who wish to further explore the experimental approach. Gary Charness is Professor of Economics and the Director of the Experimental and Behavioral Economics Laboratory at the University of California, Santa Barbara, USA. Mark Pingle is Professor of Economics at the University of Nevada, Reno, USA"--
