LUCIANITY Jan 05 2020 Lucianity, the Perverse Religion of Christians is a book about the hidden history of the New Testament -- where it not only reveals the scripture's mysterious origin ... but also its very unique and clandestine creation. In this book, the reader will learn that Christianity, the religion that people sincerely believe and practice today, is not the religion of Christ. Instead, it is the religion of an overzealous disciple who was able to gain possession of every gospel and almost every epistle, in addition to most of the other manuscripts related to early church affairs, and then after the death of the apostolic authors, edit and rewrite them to reflect his peculiar religious beliefs and philosophy. For instance, he conflated Jesus with God, and called him Lord. That disciple is identified as Lucius, the Bishop of Cyrene, who unfortunately, never understood the spiritual nature of man, the spiritual resurrection of Christ, or the purpose for why God sent Christ on a mission to Earth. As a consequence of ignorance, and the lack of understanding by Lucius, man has unknowingly accepted the false and unorthodox beliefs of Lucianity which have been incorporated into the creeds, gospels, epistles, and a host of other bible-related documents. This newly discovered information was deciphered by a seasoned detective when he deconstructed the 2000 year old biblical scripture line by line, and verse by verse. All Christians, who number in the billions today, will be stunned and perplexed by his findings, especially all the ministers who promote the Bible as the true word of God. Some of it is, and some of it isn't; nevertheless, this book identifies God's true word in Isaiah and Daniel, and it even illustrates the exactness and preciseness of His word (plus other prophetic scripture), by the use of numerous exhibits — since the detective believes a picture is worth a 1000 words. Christ flipped over the tables of the money changers signifying the coming end to the desolation that existed in the Jewish Temple. In like manner, the detective has upset an applecart full of false beliefs which will hopefully awaken people to the realization of Lucianity (or modern day desolation), and usher in the resurrection of true Christianity.

"Christians" will learn the unvarnished truth about their ascribed beliefs for probably the first time in 2000 years, and more particularly, how they have been bamboozled and conned by a very clever disciple. The Bible is the most sold, and most read, book in the entire world, and yet, not a single person in the world has recognized the fact that at least 75% of the scripture in the New Testament is really the prodigious work of a secretive, behind the scenes, apostolic era Bishop. In his writings, Lucius used ancient manuscripts and even a book by Flavius Josephus to write various gospel chapters -- not the spoken words of Jesus. While looking over the Detective's shoulder, the reader will see and learn exactly how he identified all the fraud implanted into the pages of the Bible via easy-to-understand scriptural analysis and a variety of exhibits. As such, reading the New Testament is generally a waste of time, unless one has the persistence, capability, and patience to do a thorough, time-consuming, focused, multi-year, forensic exam like the one contained inside the pages of the book "Lucianity." No similar criminal investigation of the Bible has ever been completed, and no similar book exists. If a person is searching for "just the facts" regarding their Christian faith, then the Detective assures all seekers of truth that they will know more about the Bible, God, Moses, Isaiah, Daniel, and Christ (i.e. the Anointed One of God) after reading Lucianity than they ever will by reading Biblical scripture. And more importantly, if they truly understand the message of Jesus Christ as revealed within the pages of this book, they should also learn something about themselves ... no matter their status, rank, position, race, or sex, their incarnation is not an accident of nature, but a self-chosen, deliberate, purposeful spiritual event. Just like Christ, every man, woman, and child has come to Earth in order to fulfill a spiritual mission, not to fulfill a short-sighted worldly aspiration for material goods and wealth.

Marketing in Customer Technology Environments Aug 04 2022 With the rise of virtual reality, augmented reality, the internet of things and more, customers are more engaged, more involved, and easier to reach than ever; while being inundated with increasing amounts of marketing material. This straightforward guide takes you through these new technologies and shows how to leverage them to reach new markets.

Connecting America Sep 05 2022 Broadband is the great infrastructure challenge of the early 21st century. Broadband is a foundation for economic growth, job creation, global competitiveness and a better way of life. The number of Americans who have broadband at home has grown from 8 million in 2000 to nearly 200 million last year. But, 100 million Americans do not have broadband at home. In early 2009, Congress directed the FCC to develop a National Broadband Plan to ensure that every American has access to broadband capability. This plan must also include a strategy for achieving affordability and maximizing use of broadband. The plan presented here ensures that the entire broadband ecosystem — networks, devices, content and applications; is healthy. Illus.

Cognitive Wireless Networks Sep 12 2020 This book advocates the idea of breaking up the cellular communication architecture by introducing cooperative strategies among wireless devices through cognitive wireless networking. It details the cooperative and cognitive aspects for future wireless communication networks. Coverage includes social and biological inspired behavior applied to wireless networks, peer-to-peer networking, cooperative networks, and spectrum sensing and management.

Kucers' The Use of Antibiotics Oct 02 2019 Kucers' The Use of Antibiotics is the definitive, internationally-authored reference, providing everything that the infectious diseases specialist and prescriber needs to know about antimicrobials in this vast and rapidly developing field. The much-expanded Seventh Edition comprises 4800 pages in 3 volumes in order to cover all new and existing therapies, and emerging drugs not yet fully licensed. Concentrating on the treatment of infectious diseases, the content is divided into four sections - antibiotics, anti-fungal drugs, anti-parasitic drugs, and anti-viral drugs - and is highly structured for ease of reference. Each chapter is organized in a consistent format, covering susceptibility, formulations and dosing (adult and pediatric), pharmacokinetics and pharmacodynamics, toxicity, and drug distribution, with detailed discussion regarding clinical uses - a feature unique to this title. Compiled by an expanded team of internationally renowned and respected editors, with expert contributors representing Europe, Africa, Asia, Australia, South America, the US, and Canada, the

Seventh Edition adopts a truly global approach. It remains invaluable for anyone using antimicrobial agents in their clinical practice and provides, in a systematic and concise manner, all the information required when prescribing an antimicrobial to treat infection.

Research in Attacks, Intrusions, and Defenses Nov 02 2019 This book constitutes the proceedings of the 16th International Symposium on Research in Attacks, Intrusions and Defenses, former Recent Advances in Intrusion Detection, RAID 2013, held in Rodney Bay, St. Lucia in October 2013. The volume contains 22 full papers that were carefully reviewed and selected from 95 submissions, as well as 10 poster papers selected from the 23 submissions. The papers address all current topics in computer security ranged from hardware-level security, server, web, mobile, and cloud-based security, malware analysis, and web and network privacy.

Broadband Wireless Access Networks for 4G: Theory, Application, and Experimentation Aug 24 2021 With the increased functionality demand for mobile speed and access in our everyday lives, broadband wireless networks have emerged as the solution in providing high data rate communications systems to meet these growing needs. Broadband Wireless Access Networks for 4G: Theory, Application, and Experimentation presents the latest trends and research on mobile ad hoc networks, vehicular ad hoc networks, and routing algorithms which occur within various mobile networks. This publication smartly combines knowledge and experience from enthusiastic scholars and expert researchers in the area of wideband and broadband wireless networks. Students, professors, researchers, and other professionals in the field will benefit from this book's practical applications and relevant studies.

Kucers' The Use of Antibiotics Sixth Edition Jul 31 2019 'I am unaware of any textbook which provides such comprehensive coverage of the field and doubt that this work will be surpassed in the foreseeable future, if ever!' From the foreword by Robert C. Moellering, Jr., M.D, Shields Warren-Mallinckrodt Professor of Medical Research, Harvard Medical School, USA Kucers' The Use of Antibiotics is the leading major reference work in this vast and rapidly developing field. More than doubled in length compared to the fifth edition, the sixth edition comprises 3000 pages over 2-volumes in order to cover all new and existing therapies, and emerging drugs not yet fully licensed. Concentrating on the treatment of infectious diseases, the content is divided into 4 sections: antibiotics, anti-fungal drugs, anti-parasitic drugs and anti-viral drugs, and is highly structured for ease of reference. Within each section, each chapter is structured to cover susceptibility, formulations and dosing (adult and paediatric), pharmacokinetics and pharmacodynamics, toxicity and drug distribution, detailed discussion regarding clinical uses, a feature unique to this title. Compiled by an expanded team of internationally renowned and respected editors, with a vast number of contributors spanning Europe, Africa, Asia, Australia, South America, the US and Canada, the sixth edition adopts a truly global approach. It will remain invaluable for anyone using antimicrobial agents in their clinical practice and provides in a systematic and concise manner all the information required when treating infections requiring antimicrobial therapy. Kucers' The Use of Antibiotics is available free to purchasers of the books as an electronic version on line or on your desktop: It provides access to the entire 2-volume print material It is fully searchable, so you can find the relevant information you need quickly Live references are linked to PubMed referring you to the latest journal material Customise the contents - you can highlight sections and make notes Comments can be shared with colleagues/tutors for discussion, teaching and learning The text can also be reflowed for ease of reading Text and illustrations copied will be automatically referenced to Kucers' The Use of Antibiotics

MIMO Processing for 4G and Beyond Jul 23 2021 MIMO Processing for 4G and Beyond: Fundamentals and Evolution offers a cutting-edge look at multiple-input multiple-output (MIMO) signal processing, namely its detection (in both time and frequency domains) and precoding. It examines its integration with OFDM, UWB, and CDMA, along with the impact of these combinations at the system level. Massive M

Towards Cognitive IoT Networks Dec 28 2021 This book gathers state-of-the-art research contributions written by academics and researchers, which address emerging trends in system design and implementation for the Internet of Things (IoT), and discuss how to promote IoT technologies and applications. The book is chiefly intended for researchers and academics who want to get caught up with the latest trends in enabling technologies for IoT and related applications and services. However, it also includes chapters on the fundamentals of IoT, offering essential orientation for general readers.

Introduction to Communications Technologies Dec 16 2020 Thanks to the advancement of faster processors within communication devices, there has been a rapid change in how information is modulated, multiplexed, managed, and moved. While formulas and functions are critical in creating the granular components and operations of individual technologies, understanding the applications and their purposes in the

Gender, Internet Use, and Covid-19 in the Global South Jul 11 2020 This book analyzes the use of the mobile Internet against the background of gender bias and Covid-19, currently two of the most important and pressing problems of the Global South. The book argues that the degree of benefits from this new technology depends heavily on the way it is actually used and that most new technologies are developed for the conditions prevailing in rich countries, where they tend to be quite easily adopted and used. In the Global South, by contrast, a paucity of digital skills and other factors make the potentially valuable benefits from the Internet much more difficult to derive. Using empirical data recently provided by the Groupe Speciale Mobile Association (GSMA), the book examines the existence and extent of the digital divide between males and females in mobile Internet use, which constitutes a new form of divide. It sheds light on the acute difficulty for first-time mobile Internet users in the Global South, and especially Sub-Saharan Africa, to learn the digital skills that are needed to use the said technology effectively, with a special focus on how these users acquire the required knowledge, without having undergone the process of learning by doing. The book further discusses the determinants of digital skills in the Global South, as well as major factors underlying the extent to which different users actually benefit from the mobile Internet, such as gender, location, age, and education. Finally, it investigates how womens' use of the Internet has been altered by the pandemic in the Global South. This book will appeal to students, researchers, and scholars of development economics and development studies, as well as policy-makers interested in a better understanding of the impact of gender bias and Covid-19 on mobile internet use in the Global South.

Global Business Apr 19 2021 Discover success in global business today with the strategic approach and unique coverage found only in Peng's GLOBAL BUSINESS, 5E. This book asks the big question, What determines the success and failure of firms around the globe? Award winning scholar and author Mike Peng answers from both an institution-based and resource-based view in every chapter. This inviting, conversational approach highlights the latest research and examples of recent global developments. New cases from international experts examine how companies are expanding globally and responding to COVID. Unique debate sections draw you into engaging discussions that sharpen your independent thinking and strengthen your perspective on business challenges. You examine today's geopolitics, risk management, tariffs and trade compliance, supply chain reorganization and management of stakeholder relationships as you gain the understanding you need to become an effective manager within today's global business landscape. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Marketing Scheme on Peer-to-Peer (P2P) Communication Software Anticipating 4G Nov 07 2022 Inhaltsangabe:Abstract: This diploma thesis paper is, after contemplating the current state of ITC / telco's shift towards commoditisation and challenges in facing the upcoming overall mobile / wireless development (beyond 3G, B3G, /4G) aimed at prosperously resolving a marketing proposition on a quite ingenious Siemens mobile P2P communication solution, named Siemens

Anywhere PocketSERVENT, by virtue of the marketers' generic means, the Product-marketing mix dedicated to fundamental questions of product, price, promotion, place (P4). Strategic marketing and ITC business as well as down-to-earth / operational themes will get propelled. The chief emphasis is put on surging virtualisation related to product / svce / property and, as usually less exposed, the shift towards intangible values, foremost customer relationship and momentum of the hi-tech. brand (perception). The intend is to supply a big yet detailed P2P, 3G / B3G and wireless picture to the marketer (even accountant) as well as applied marketing / pricing issues to the S/W developer or mobile techn. expert. After a brief overview (ch. 1), chapter 2 is about introducing the main points rel. peer-to-peer (P2P) it's rather social impacts, technological mindset and ongoing research, as well as contemporary benefits. The intention is to free both the subject and evaluation from hype or byzantine aspects; to present P2P's potential as well as existent contributions to corporations aware of bus. value from IT, paralleling the fashion well-known IT players dominate e.g. Web services. Chapter 3 prepares a general understanding of present-day and forthcoming ITC leitmotifs, more precisely, for why ITC, esp. 3G innovations, have been disappointing. Analysing soft product and service (svce / svc.) innovations is upon hard value; at the dawn of this decade's decentralisation / mobilisation and virtualisation following results and side effects of globalisation the tractate's author is going to constantly question whether proven and established marketing practice can answer the train of virtual i.e. through-and-through digital products, value chains, organisations or business and / or value creation communities. Nevertheless ch. 3's focal point is the wireless or mobile wireless, resp., upgrowth (convergence rel. mobile IP, P2P, B3G / 4G). At beginning of the new millennium telcos are forced to get out of the industrial age's proprietary hardware and services. Less because of customer's [...]

Networking -- ICN 2005 Oct 26 2021 The International Conference on Networking (ICN 2005) was the fourth conference in its series aimed at stimulating technical exchange in the emerging and important field of networking. On behalf of the International Advisory Committee, it is our great pleasure to welcome you to the proceedings of the 2005 event. Networking faces dramatic changes due to the customer-centric view, the venue of the next generation networks paradigm, the push from ubiquitous networking, and the new service models. Despite legacy problems, which researchers and industry are still discovering and improving the state of the art, the horizon has revealed new challenges that some of the authors tackled through their submissions.

In fact ICN2005 was very well perceived by the international networking community. A total of 651 papers from more than 60 countries were submitted, from which 238 were accepted. Each paper was reviewed by several members of the Technical Program Committee. This year, the Advisory Committee revalidated various accepted papers after the reviews had been incorporated. We perceived a significant improvement in the number of submissions and the quality of the submissions. The ICN2005 program covered a variety of research topics that are of current interest, starting with Grid networks, multicasting, TCP optimizations, QoS and security, emergency services, and network resiliency. The Program Committee selected also three tutorials and invited speakers that addressed the latest research results from the international industries and academia, and reports on findings from mobile, satellite, and personal communications related to 3rd- and 4th-generation research projects and standardization.

Computerworld Jan 17 2021 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

UMTS Networks and Beyond Sep 24 2021 An all-encompassing coverage on UMTS Networks including an in-depth discussion of current work on UMTS evolution and 4G. UMTS Networks and Beyond offers a comprehensive introduction to the networking aspects of UMTS and the networks coming after UMTS. The book is unique in that it systematically compares how a particular problem, e.g. obtaining connectivity, is solved in UMTS and how the same problem is solved in a Computer Network such as the Internet. It also highlights why the respective solutions are so different. The first part of the book provides a detailed technical discussion of UMTS, including original vision, architecture, protocol stacks and overall functionality. It places UMTS in the context of its evolution of from GSM and its convergence with Computer Networks. The second part of the book discusses today's vision of 4G, and introduces upcoming networking technologies. Emphasis is on LTE / SAE as successor of UMTS; UMB, WiMAX and NGN are also discussed. The book gives an overview of what these technologies are likely to offer, of their architectures, protocols and functionality. It also discusses their differences and similarities, and whether they will qualify as 4G. Key Features: Provides readers, particularly those with a background in IP-based networks, with a technical understanding of what UMTS does, how it works and how it is likely to evolve Explains the differences in design between UMTS Networks and Computer Networks and discusses how these design divergences can be reconciled in the future Shows how economic considerations shape the design of UMTS Motivates why particular design choices are made in UMTS Gives an in-depth introduction to LTE / SAE Provides a detailed picture of the state of the art in 4G Illustrates the theory with numerous tables and figures This comprehensive textbook is essential reading for advanced students and lecturers in communications systems and networking. It is also of interest to engineers and researchers in the field of UMTS and communications systems.

Handbook of Integration of Cloud Computing, Cyber Physical Systems and Internet of Things Feb 15 2021 This handbook covers recent advances in the integration of three areas, namely, cloud computing, cyber-physical systems, and the Internet of things which is expected to have a tremendous impact on our daily lives. It contains a total of thirteen peer-reviewed and edited chapters. This book covers topics such as context-aware cyber-physical systems, sustainable cloud computing, fog computing, and cloud monitoring; both the theoretical and practical aspects belonging to these topics are discussed. All the chapters also discuss open research challenges in the areas mentioned above. Finally, the handbook presents three use cases regarding healthcare, smart buildings and disaster management to assist the audience in understanding how to develop next-generation IoT- and cloud-enabled cyber-physical systems. This timely handbook is edited for students, researchers, as well as professionals who are interested in the rapidly growing fields of cloud computing, cyber-physical systems, and the Internet of things.

Digital Human Modeling, Applications in Health, Safety, Ergonomics, and Risk Management: Ergonomics and Design Nov 26 2021 The two-volume set LNCS 10286 + 10287 constitutes the refereed proceedings of the 8th International Conference on Digital Human Modeling and Applications in Health, Safety, Ergonomics, and Risk Management, DHM 2017, held as part of HCI International 2017 in Vancouver, BC, Canada. HCII 2017 received a total of 4340 submissions, of which 1228 papers were accepted for publication after a careful reviewing process. The 75 papers presented in these volumes were organized in topical sections as follows: Part I: anthropometry, ergonomics, design and comfort; human body and motion modelling; smart human-centered service system design; and human-robot interaction. Part II: clinical and health information systems; health and aging; health data analytics and visualization; and design for safety.

Corporate Finance Mar 19 2021 The book that fills the practitioner need for a distillation of the most important tools and concepts of corporate finance In today's competitive business environment, companies must find innovative ways to enable rapid and sustainable growth not just to survive, but to thrive. Corporate Finance: A Practical Approach is designed to help financial analysts, executives, and investors achieve this goal with a practice-oriented distillation of the most

important tools and concepts of corporate finance. Updated for a post-financial crisis environment, the Second Edition provides coverage of the most important issues surrounding modern corporate finance for the new global economy: Preserves the hallmark conciseness of the first edition while offering expanded coverage of key topics including dividend policy, share repurchases, and capital structure Current, real-world examples are integrated throughout the book to provide the reader with a concrete understanding of critical business growth concepts Explanations and examples are rigorous and global, but make minimal use of mathematics Each chapter presents learning objectives which highlight key material, helping the reader glean the most effective business advice possible Written by the experts at CFA Institute, the world's largest association of professional investment managers Created for current and aspiring financial professionals and investors alike, Corporate Finance focuses on the knowledge, skills, and abilities necessary to succeed in today's global corporate world.

Theory and Practice of Natural Computing Aug 31 2019 This book constitutes the refereed proceedings of the Second International Conference, TPNC 2013, held in Cáceres, Spain, in December 2013. The 19 revised full papers presented together with one invited talk were carefully reviewed and selected from 47 submissions. The papers are organized in topical sections on nature-inspired models of computation; synthesizing nature by means of computation; nature-inspired materials and information processing in nature.

Hearings Jun 02 2022

Cyber Defence in the Age of AI, Smart Societies and Augmented Humanity Jun 09 2020 This publication highlights the fast-moving technological advancement and infiltration of Artificial Intelligence into society. Concepts of evolution of society through interconnectivity are explored, together with how the fusion of human and technological interaction leading to Augmented Humanity is fast becoming more than just an endemic phase, but a cultural phase shift to digital societies. It aims to balance both the positive progressive outlooks such developments bring with potential issues that may stem from innovation of this kind, such as the invasive procedures of bio hacking or ethical connotations concerning the usage of digital twins. This publication will also give the reader a good level of understanding on fundamental cyber defence principles, interactions with Critical National Infrastructure (CNI) and the Command, Control, Communications and Intelligence (C3I) decision-making framework. A detailed view of the cyber-attack landscape will be garnered; touching on the tactics, techniques and procedures used, red and blue teaming initiatives, cyber resilience and the protection of larger scale systems. The integration of AI, smart societies, the human-centric approach and Augmented Humanity is discernible in the exponential growth, collection and use of [big] data; concepts woven throughout the diversity of topics covered in this publication; which also discusses the privacy and transparency of data ownership, and the potential dangers of exploitation through social media. As humans are become ever more interconnected, with the prolificacy of smart wearable devices and wearable body area networks, the availability of and abundance of user data and metadata derived from individuals has grown exponentially. The notion of data ownership, privacy and situational awareness are now at the forefront in this new age.
