*Mathematical Statistics for Economics and Business Jun 19 2021* A comprehensive introduction to the principles underlying statistical analyses in the fields of economics, business, and econometrics. The selection of topics is specifically designed to provide students with a substantial conceptual foundation, from which to achieve a thorough and mature understanding of statistical applications within the fields. After introducing the concepts of probability, random variables, and probability density functions, the author develops the key concepts of mathematical statistics, notably: expectation, sampling, asymptotics, and the main families of distributions. The latter half of the book is then devoted to the theories of estimation and hypothesis testing with associated examples and problems that indicate their wide applicability in economics and business. Includes hundreds of exercises and problems.

*Sweet and Sour Jan 15 2021* "Sweet and Sour" examines the history of Chinese family restaurants in the U. S. and Canada. Why did many Chinese immigrants enter this business around the end of the 19th century? What conditions made it possible for Chinese to open and succeed in operating restaurants after they emigrated to North America? How did Chinese restaurants manage to attract non-Chinese customers, given that they had little or no acquaintance with the Chinese style of food preparation and many had vicious hostility toward Chinese immigrants? The goal of "Sweet and Sour" is to understand how the small Chinese family restaurants functioned. Narratives provided by 10 Chinese who grew up in their family restaurants in all parts of the North America provide valuable insights on the role that this ethnic business had on their lives. Is there any future for this type of immigrant enterprise in the modern world of franchised and corporate owned eateries or will it soon, like the Chinese laundry, be a relic of history? Excerpts from Reviews I greatly admired and enjoyed "Sweet and Sour: Life in Chinese Family Restaurants" It does an excellent job of going over the historical background on early U. S. Chinese restaurants, unearthing lots of material new to me. And the interviews of Chinese restaurateurs opened up a whole new side to the story, of what it was like to work and live in these restaurants. Andrew Cole, "Chop Suey: A Cultural History of Chinese Food in the United States" "Sweet and Sour: Life in Chinese Family Restaurants" tackles the long-neglected topic of Chinese food with a focus on Chinese restaurants. This well-researched, thoughtfully conceptualized monograph brings academic rigor and adds historical depth, as well as the perspectives of an insightful scholar and a second-generation Chinese American, to our understanding of the development of Chinese food in the realm of public consumption in the United States and Canada. It promises to elevate that understanding to a higher level... Through this book, I hope, consumers at the ubiquitous Chinese restaurants can also gain a deeper appreciation of historical forces and human experiences that have shaped the food they now enjoy. Yong Chen, Professor of History, University of California, Irvine. "San Francisco Chinese 1850-1943: A Trans-Pacific Community." "Sweet and Sour" covers many important aspects of the Chinese restaurant business and it is a great contribution to the study of Chinese food in America. This area really deserves more attention than it has had. Haiming Liu, Prof.Ethnic & Women's Studies, Calif. State Polytechnic Univ. Pomona. I am reading your delightful book, Sweet and Sour. I especially like the "Insider Perspectives" section. Those first-hand experiences can generate a lot of potentially testable hypotheses about how the Chinese were able to provision their remote restaurants with exotic ingredients while other ethnic groups could not. Susan B. Carter, Univ. of California, Riverside Reader Comments You've made some amazing observations, wrote them down with sincerity, and I wholeheartedly support you on it. You've brought back some fond memories and I'm sure it will touch other folks like myself that have gone through it. Dave Chow When reading Sweet and Sour, I was struck by how it is both a work of scholarship and a documentation of the experience of Chinese restaurant workers. It serves to teach us about their experiences on multiple levels. Heather Lee Brings back childhood memories as most of the people interviewed are from Toisan like my family. We could always go into a new town, drop in at a Chinese restaurant and be welcomed. Dad would run out and say, "they're cousins! Rosemary Eng

*Stats To Go Dec 14 2020* 'Stats to Go' is a user-friendly guide for hospitality, leisure and tourism students who need to learn statistics and statistical techniques. 'Stats to go' is an ideal companion to hospitality, leisure and tourism studies as the breadth of coverage supports all taught numerical aspects of these types of course. Examples from hospitality, leisure and tourism organizations: \* licensed premises \* fast food outlets \* hotels \* theme parks and their environments are used to illustrate key issues of the text. The area of quantitative methods is one which many students find unapproachable or daunting. With the use of a clear learning structure, and a user friendly, non-theoretical approach, Buglear has created a text which students and lecturers alike will find indispensable.

*Popular Science Aug 22 2021* Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Cash and Dash Sep 03 2022 *Cash and Dash: How ATMs and Computers Changed Banking* uses the invention and development of the automated teller machine (ATM) to explain the birth and evolution of digital banking, from the 1960s to present day. It tackles head on the drivers of long-term innovation in retail banking with emphasis on the payment system. Using a novel approach to better understanding the industrial organization of financial markets, *Cash and Dash* contributes to a broader discussion around innovation and labour-saving devices. It explores attitudes to the patent system, formation of standards, organizational politics, the interaction between regulation and strategy, trust and domestication, maintenance versus disruption, and the huge undertakings needed to develop online real-time banking to customers.

Operations Management for Competitive Advantage Feb 25 2022 *Chase, Jacobs and Aquilano: Operations Management for Competitive Advantage, 11/e (CJA)* provides a current and thorough introduction to the concepts, processes, and methods of managing and controlling operations in manufacturing or service settings. The text provides comprehensive coverage, from high-tech manufacturing to high touch services with a balanced treatment. *Chase, Jacobs, and Aquilano* also thoroughly integrates and discusses current issues such as globalization; supply chain strategy, E-business, and ERP. The concepts are illustrated by using abundant real world examples, articles, illustrations, problems and cases. Technology is integral to the success of this course, as such, *CJA* also provide students and instructors with an innovative array of leading edge technology learning and teaching tools.

The *Oxford Color Portuguese Dictionary* contains over 40,000 words and phrases, and over 65,000 translations, and features the same exceptionally clear colour layout as the other titles in the series.

Knowledge-Based and Intelligent Information and Engineering Systems Oct 24 2021 The 14 International Conference on Knowledge-Based and Intelligent Information and Engineering Systems was held during September 8–10, 2010 in Cardiff, UK. The conference was organized by the School of Engineering at Cardiff University, UK and KES International. KES2010 provided an international scientific forum for the presentation of the results of high-quality research on a broad range of intelligent systems topics. The conference attracted over 360 submissions from 42 countries and 6 continents: Argentina, Australia, Belgium, Brazil, Bulgaria, Canada, Chile, China, Croatia, Czech Republic, Denmark, Finland, France, Germany, Greece, Hong Kong, ROC, Hungary, India, Iran, Ireland, Israel, Italy, Japan, Korea, Malaysia, Mexico, The Netherlands, New Zealand, Pakistan, Poland, Romania, Singapore, Slovenia, Spain, Sweden, Syria, Taiwan, - nisia, Turkey, UK, USA and Vietnam. The conference consisted of 6 keynote talks, 11 general tracks and 29 invited sessions and workshops, on the applications and theory of intelligent systems and related areas. The distinguished keynote speakers were Christopher Bishop, UK, Nikola - sabov, New Zealand, Saeid Nahavandi, Australia, Tetsuo Sawaragi, Japan, Yuzuru Tanaka, Japan and Roger Whitaker, UK. Over 240 oral and poster presentations provided excellent opportunities for the presentation of interesting new research results and discussion about them, leading to knowledge transfer and generation of new ideas. Extended versions of selected papers were considered for publication in the International Journal of Knowledge-Based and Intelligent Engineering Systems, Engineering Applications of Artificial Intelligence, Journal of Intelligent Manufacturing, and Neural Computing and Applications.
