Time and Death Mar 03 2020 In *Time and Death* Carol White articulates a vision of Martin Heidegger's work which grows out of a new understanding of what he was trying to address in his discussion of death. Acknowledging that the discussion of this issue in Heidegger's major work *Being and Time* is often far from clear, White presents a new interpretation of Heidegger which short-circuits many of the traditional criticisms. White claims that we are all in a better position to understand Heidegger's insights after fifty years because they have now become a part of the conventional wisdom of common opinion. His view shows up in accounts of knowledge in the physical sciences, in the assumptions of the social sciences, in art and film, even in popular culture in general, but does so in ways ignorant of their origins. Now that these insights have filtered down into the culture at large, we can make Heidegger intelligible in a way that perhaps he himself could not. White presents the best possible case for Heidegger, making him more intelligible to those people with a long acquaintance with his work, those with a long aversion to it and in particular to those just starting to pursue an interest in it. White places the problems with which Heidegger is dealing in the context of issues in contemporary Anglo-American philosophy, in order to better locate him for the more mainstream audience. The language and approach of the book is able to accommodate the novice but also offers much food for thought for the Heidegger scholar.

Patina Nov 10 2020 Wenn dir Flügel wachsen PATINA rennt wie ein Blitz. Sie rennt für ihre Ma, die aufgrund ihrer Diabetes beide Beine verloren hat, sie rennt für ihre kleine Schwester Maddy, und sie rennt, um endlich all die Verantwortung, die auf ihr lastet, abschütteln zu können. In der Schule gehört sie zu den Besten, für Albernheiten und Kindsein bleibt wenig Spielraum. Nur manchmal kommt PATINA überhaupt zum Träumen. Dann denkt sie an ihr Idol Florence Griffith Joyner mit den bunten langen Fingernägeln. So wie sie möchte sie später auch rennen und gefeiert werden. Beim Rennen vergisst sie alles. Dann ist sie nur noch Rhythmus und Geschwindigkeit. Und verdammt cool, wie GHOST findet, und jeder andere aus der Mannschaft auch.

Das Schicksal ist ein mieser Verräter Jun 29 2022 „Krebsbücher sind doof“, sagt die 16-jährige Hazel, die selbst Krebs hat. Global Environmental Constitutionalism in the Anthropocene Jan 01 2020 There is persuasive evidence suggesting we are on the brink of human-induced ecological disaster that could change life on Earth as we know it. There is also a general consensus among scientists about the pace and extent of global ecological decay, including a realisation that humans are central to causing the global socio-ecological crisis. This new epoch has been called the Anthropocene. Considering the many benefits that constitutional environmental protection holds out in domestic legal orders, it is likely that a constitutionalised form of global environmental law and governance would be better able to counter the myriad exigencies of the Anthropocene. This book seeks to answer this central question: from the perspective of the Anthropocene, what is environmental constitutionalism and how could it be extrapolated to formulate a global framework? In answering this question, this book offers the first systematic conceptual framework for global environmental constitutionalism in the epoch of the Anthropocene.

Atomic Environments Apr 03 2020 "In "Atomic Environments," Neil S. Oatsvall examines how top policymakers in the Truman and Eisenhower administrations used environmental science in their work developing nuclear strategy at the beginning of the Cold War. While many people were involved in research and analysis during the period in question, it was at highest levels of executive decision-making where environmental science and nuclear science most clearly combined to shape the nation's policies. Because making and testing weapons, dealing with fallout and nuclear waste, and finding uses for radioactive byproducts required advanced understanding of how nuclear systems interacted with the world, policymakers utilized existing networks of environmental scientists-particularly meteorologists, geologists, and ecologists-to understand and control the United States' use of nuclear technology. Instead of profiling individuals, Oatsvall focuses on executive institutions, especially the leadership of the Atomic Energy Commission (AEC) and high level officials in the Truman and Eisenhower White Houses, including the presidents, themselves. By scrutinizing institutional policymaking practices and agendas at the birth of the nuclear age, a constant set of values becomes clear: "Atomic Environments" reveals an emerging technocratic class that consistently valued knowledge about the environment to help create and maintain a nuclear arsenal, despite its existential threat to life on earth and the negative effects many nuclear technologies directly had on ecosystems and the American people, alike. "Atomic Environments" is divided into five chapters, each of which probes a different facet of the entanglement between environment, nuclear technologies, and policymaking. The first three chapters form a rough narrative arc about nuclear weapons. Chapter One situates bombs in their "natural habitat" by considering why nuclear tests occurred where they did and what testers thought they revealed about the natural environment and how they influenced it. Focusing on nuclear fallout, Chapter Two argues that nuclear tests actually functioned as a massive, uncontrolled experiment in world environments and human bodies that intermingled medicine, nuclear science, and environmental science. Chapter Three shows how the environmental knowledge gained in the first two chapters led to nuclear test ban treaty talks during the Eisenhower era, when the advancement of environmental knowledge and the natural world itself became crucial grounds of contention in the creation of nuclear test detection and evasion systems. The last two chapters step away from weapons to question how other nuclear technologies and facets of the U.S. nuclear program interacted with the natural world. Chapter Four examines agriculture's place in the U.S. nuclear program, from breakthrough advances in agricultural science including the use of radioisotopes and the direct application of radiation to food, to "atomic agriculture's" public relations value as a peaceful proxy, which shifted the moral calculus and further leveraged the U.S. government's atomic power. Chapter Five shows how knowledge of the natural world and the functioning of its systems proved important to uncovering the most effective ways to dispose of nuclear waste. Running throughout, Oatsvall consistently demonstrates how the natural world and the scientific disciplines that study it became integral parts of nuclear science, rather than adversarial fields of knowledge. But while nuclear technologies heavily depended on environmental science to develop, those same technologies frequently caused great harm to the natural world. Moreover, while some individuals expressed real anxieties about the damage wrought by nuclear technologies, policymakers as a class consistently made choices that privileged nuclear boosterism and secrecy, prioritizing institutional values over the lives and living systems that agencies like the AEC were ostensibly charged to protect. In the end, Oatsvall argues that although policymakers took their charge to protect and advance the welfare of the United States and its people seriously, they often failed to do so because their allegiance to the U.S. nuclear hierarchy blinded them to the real risks and dangers of the nuclear age"--

The Great Ordovician Biodiversification Event Jan 31 2020 Two of the greatest evolutionary events in the history of life on Earth occurred during Early Paleozoic time. The first was the Cambrian explosion of skeletonized marine animals about 540 million years ago. The second was the "Great Ordovician Biodiversification Event," which is the focus of this book. During the 46-million-year Ordovician Period (489--443 m.y.), a bewildering array of adaptive radiations of "Paleozoic- and Modern-type" biotas appeared in marine habitats,

the first animals (arthropods) walked on land, and the first non-vascular bryophyte-like plants (based on their cryptospore record) colonized terrestrial areas with damp environments. This book represents a compilation by a large team of Ordovician specialists from around the world, who have enthusiastically cooperated to produce this first globally orientated, internationally sponsored IGCP (International Geological Correlation Program) project on Ordovician biotas. The major part is an assembly of genus- and species-level diversity data for the many Ordovician fossil groups. The book also presents an evaluation of how each group diversified through Ordovician time, with assessments of patterns of change and rates of origination and extinction. As such, it will become the standard work and data source for biotic studies on the Ordovician Period.

The Unharnessed World Jun 05 2020 Though New Zealand author Janet Frame (1924–2004) lived at a time of growing dissatisfaction with European cultural models, and though her (auto-)biography, fiction and letters all testify to the fact that a direct encounter between herself and Buddhism occurred, her work has, so far, never been examined from the vantage point of its indebtedness to Buddhism. It is of the utmost significance, however, that a Buddhist navigation of Frame's texts should shed fresh light on large segments of the Framean corpus which have tended to remain obdurately mysterious. This includes passages centering on such themes as the existence of a non-dual world or a character's sudden embrace of a non-ego-like self. Of equal significance is the conclusion one then draws that this unharnessed world which human beings are often unable to embrace has always been right under their nose, for, whenever the aspect of the intellect that filters perceptions into mutually excluding categories fails to function, he or she finds a place of subjective arrival in, and sees, this supposedly unknowable 'beyond'. Thus, possibly against the grain of mainstream criticism, this study argues that Janet Frame constantly seeks ways through which the infinite and the Other can be approached, though not corrupted, by the perceiving self, and that she found in the Buddhist epistemology a pathway towards evoking such alterity.

Alles zerfällt Oct 22 2021 Der Afrika-Roman, der die moderne afrikanische Literatur begründete und die Weltliteratur prägte – endlich in neuer Übersetzung! Chinua Achebe erzählt von Verrat und Rache, von Leidenschaften, die keine Ruhe finden, und von Sehnsüchten, die keine Zukunft haben. Okonkwo, stark und jähzornig, stößt sich an den strengen Stammesregeln und zerbricht an dem Regime der britischen Kolonialherren. In seinem Meisterwerk beschreibt Achebe den Konflikt einer archaischen Kultur in einer Sprache, die rituell-sprichwörtlich, dokumentarisch und elementar poetisch ist: Mit diesem Roman erhielt der Kontinent eine Stimme.

Die Zeitmaschine Sep 01 2022 "Was der Zeitreisende in der Hand hielt, war ein glitzerndes Rahmenwerk aus Metall, kaum größer als eine kleine Uhr, und sehr fein gearbeitet. Es war Elfenbein daran und eine durchsichtige, kristallinische Substanz. Und jetzt muß ich ausführlich werden, denn was folgt, ist – wenn man nicht seine Erklärung annimmt, etwas absolut Unerklärliches." Herbert George Wells. Die Zeitmaschine. Übersetzt von Felix Paul Grewe. Englischer Originaltitel: »The Time-Machine«, Heinemann, London 1895. Durchgesehener Neusatz, diese Ausgabe folgt: Rowohlt Verlag, München 1951. Eine Geschichte der Welt in 10,5 Kapiteln Feb 23 2022 Ein Klassiker von Julian Barnes – genial und witzig In 101?2 miteinander korrespondierenden Episoden schreibt Julian Barnes davon, wie es ist, wenn man sich in die Fluten des Lebens stürzt. Auf den Spuren des Arche-Noah-Mythos nagt er sich, einem seiner kleinsten Protagonisten gleich, durch das Leben und die Geschichten, die es schreibt. Er berichtet von einem blinden Passagier, der mit ansehen muss, wie seine Mitreisenden einer nach dem anderen von der hungrigen Mannschaft der Arche Noah verspeist werden, von den sonderbaren Irrfahrten einer jungen Frau, von einer beschwerlichen Reise zum Berg Ararat, einem Filmdreh in Südamerika, der furchtbar in die Hose geht, von einer Geiselnahme auf hoher See, von Géricaults »Floß der Medusa« und wie aus einer Katastrophe Kunst wird.»Eine Geschichte der Welt in 101?2 Kapiteln« ist ein meisterliches Spiel mit Erzählformen und Perspektiven, eine Reise durch die Jahrhunderte und durch die Möglichkeiten der Sprache.

Chapter 4: Solar Radiation and Earth May 29 2022 Chapter 4: Solar Radiation and Earth of the eBook Understanding Physical Geography. This eBook was written for students taking introductory Physical Geography taught at a college or university. For the chapters currently available on Google Play presentation slides (Powerpoint and Keynote format) and multiple choice test banks are available for Professors using my eBook in the classroom. Please contact me via email at Michael.Pidwirny@ubc.ca if you would like to have access to these resources. The various chapters of the Google Play version of Understanding Physical Geography are FREE for individual use in a non-classroom environment. This has been done to support life long learning. However, the content of Understanding Physical Geography is NOT FREE for use in college and university courses in countries that have a per capita GDP over \$25,000 (US dollars) per year where more than three chapters are being used in the teaching of a course. More specifically, for university and college instructors using this work in such wealthier countries, in a credit-based course where a tuition fee is assessed, students should be instructed to purchase the paid version of this content on Google Play which is organized as one of six Parts (organized chapters). One exception to this request is a situation where a student is experiencing financial hardship. In this case, the student should use the individual chapters which are available from Google Play for free. The cost of these Parts works out to only \$0.99 per chapter in USA dollars, a very small fee for my work. When the entire textbook (30 chapters) is finished its cost will be only \$29.70 in USA dollars. This is far less expensive than similar textbooks from major academic publishing companies whose eBook are around \$50.00 to \$90.00. Further, revenue generated from the sale of this academic textbook will provide "the carrot" to entice me to continue working hard creating new and updated content. Thanks in advance to instructors and students who abide by these conditions. IMPORTANT - This Google Play version is best viewed with a computer using Google Chrome, Firefox or Apple Safari browsers.

Canadian Culture in a Globalized World Feb 11 2021 Since the first trade deal with the US in 1987, Canada has insisted on a "cultural exemption" to ensure that governments were free to protect Canadian culture and to restrict foreign ownership and limit foreign content in the media. Negotiators and government ministers considered the cultural exemption key to reassuring Canadians that the deal did not undermine our cultural sovereignty. In every trade deal since, culture has been a contentious issue. Media giants and foreign governments have pushed for unlimited access to Canada. Ottawa has worked with cultural industries to maintain the cultural exemption. Garry Neil has been close to every one of these negotiations, and has been a key advisor to cultural groups on trade deals. He has been part of the international initiative to assert the importance of cultural diversity in the world, and to create effective measures to guarantee it. This book reflects his experience trying to ensure that the reality matches the rhetoric when it comes to culture. As he sees it, in spite of the claims, Canadian cultural policies and programs have been steadily restricted by successive trade deals. He explains how this has happened, and what needs to be done for Canada to maintain our cultural sovereignty and creative life in the face of multinational corporations and their government supporters who are promoting a world monoculture.

Drowning in the Lake while Embracing the Reflection of the Moon Sep 28 2019 What are all the levels of reality? This book guides the reader who is seeking the source of underlying reality by providing mental tools and detailed research methods to answer the ancient question, "What does God, Brahman, and Tao communicate to the Universe?" Howard describes how the three dimensions of time emerged from the mind and consciousness. Providing exact scientific mental tools and detailed research methods, this book will help the reader identify information within the communications from the source of reality.

World Yearbook of Education 2023 Aug 27 2019 The World Yearbook of Education 2023 centers on the intersection of racialization, inequality, and education. It critically examines how racial formation and its associated logics about citizenship, belonging, justice, equality, and humanity manifest in early childhood education, primary, secondary, and higher education, as well as non-formal, community-based education settings. The chapters offer multisited perspectives into how racialization has and continues to shape educational inequality, with an eye towards the agency and resistance of youth and communities in contesting such forms of domination and marginalization. Across three sections, the book examines how forces of imperialism, white supremacy, and colonization have shaped racialization in distinct locations and how education was historically utilized as a site for both the creation and/or reification of difference. It reveals the lingering effects of processes of racialization in distinct locations globally and their intersections with educational policies, ideologies, systems, and realities. Inviting readers to learn, reflect, and engage with the layered and complex realities of racialization and inequality in education across the globe, World Yearbook of Education 2023 is a timely and important contribution to discussions of racialization and provides the field with a robust foundation for future critical inquiry and engagement with the themes of race, racialization, inequality, and education.

Wer bin ich, wenn ich online bin... Apr 15 2021 Wie beeinflusst sie Körper und Geist? Heute schon gegoogelt? Im Durchschnitt sind die Deutschen etwa zweieinhalb Stunden täglich online. Neuesten Studien zufolge, so zeigt Bestsellerautor und IT-Experte Nicholas Carr, bewirkt bereits eine Onlinestunde am Tag erstaunliche neurologische Prägungen in unserem Gehirn. Wer das Internet nach Informationen, sozialen Kontakten oder Unterhaltung durchforstet, verwendet, anders als beim Buch- oder Zeitungslesen, einen Großteil seiner geistigen Energie auf die Beherrschung des Mediums selbst. Und macht sich um die Inhalte, buchstäblich, keinen Kopf. Die Folge: Im Internetzeitalter lesen wir oberflächlicher, lernen wir schlechter, erinnern wir uns schwächer denn je. Von den Anpassungsleistungen unseres Gehirns profitieren nicht wir, sondern die Konzerne, die mit Klickzahlen Kasse machen. In seinem neuen Buch verbindet Carr, zwanzig Jahre nach Entstehung des World Wide Web, seine medienkritische Bilanz mit einer erhellenden Zeitreise durch Philosophie-, Technologie- und Wissenschaftsgeschichte – von Sokrates' Skepsis gegenüber der Schrift, dem Menschen als Uhrwerk und Nietzsches Schreibmaschine bis zum User als Gegenstand aktueller Debatten und Studien. Und er vermittelt – jenseits von vagem Kulturpessimismus – anhand greifbarer Untersuchungen und Experimente, wie das Internet unser Denken verändert.

Der weiße Tiger Jul 19 2021 Balram Halwai ist ein ungewöhnlicher Ich-Erzähler: Diener, Philosoph, Unternehmer, Mörder. Ismael Sep 20 2021 »Lehrer sucht Schüler mit ernsthaftem Verlangen, die Welt zu retten.« Ein Mann von den Versuchen der 68er enttäuscht, in ein neues Zeitalter aufzubrechen, begibt sich mehr aus Wut über diese Zeitungsanzeige denn aus Idealismus zu der angegebenen Adresse. Doch statt des erhofften Gurus entdeckt er in der großen, leerstehenden Wohnung einen riesigen Gorilla. Ismael - so sein Name - hat ein erstaunliches Leben hinter sich, und was er zu erzählen weiß, zieht den skeptischen Schüler völlig in seinen Bann. Die

beiden geraten in ein philosophisches Gespräch über den Zustand der Welt. Schritt für Schritt führt der weise Affenlehrer den Schüler an sein Denkgebäude heran und dringt mit ihm in metaphysische Tiefen vor, um dem Rätsel menschlichen Verhaltens und Strebens auf die Spur zu kommen. Dieses Verfahren ermöglicht eine überraschende Antwort auf die Frage, wie der Mensch der Gefangene einer Zivilisation wurde, die ihn scheinbar zwingt, sein Paradies, die Erde, zu zerstören. Gemeinsam gehen Lehrer und Schüler den Weg der Evolution bis zu jenem Tag zurück, da sich der Homo sapiens zur Krone der Schöpfung erklärte und anfang, sich die Erde »untertan zu machen« - mit verheerenden Folgen wie wir wissen ...

European Monetary Union Dec 12 2020 This book explores the new macroeconomics of the European Monetary Union. It carefully discusses the effects of shocks and policy measures on employment, prices, and the current account. Take for instance a shock or a policy measure in a specific union country. Then what will be the results in the specific country, in the other union countries, and in the rest of the world? The targets of economic policy are full employment and price stability in each of the union of economic policy are monetary policy by the Euro countries. The instruments pean Central Bank and fiscal policies by national governments. What is the appropriate policy mix? A salient feature of this book is the numerical estimation of shock and policy multipliers. Money wages are fixed, flexible or downward rigid. The monetary union can be small or large. I had many helpful talks with Gerd Focke, Daphni-Marina Papadopoulou, Franco Reither, Wolf Schafer, Christine Schafer-Lochte, and Michael Schmid. In addition, Michael Brauning and Michael Cyrus carefully discussed with me all parts of the manuscript. Last but not least, Doris Ehrich did the secretarial work as excellently as ever. I wish to thank all of them. Executive Summary

1) Small monetary union of two identical countries, say Gennany and France. The monetary union is a small open economy with perfect capital mobili ty. Let us begin with fiscal policy.

Hymne Jun 17 2021 Er lebte in einer dunklen Zukunft. In einer Welt ohne Liebe hatte er den Mut, nach Liebe zu suchen. In einer Zeit ohne Wissenschaft und Zivilisation hatte er den Mut, Wissen zu suchen und zu finden. Doch nicht aufgrund dieser Verbrechen wurde er gejagt. Sein Leben stand auf dem Spiel, weil er die eine unverzeihliche Sünde begangen hatte: Er wollte sich nicht einer menschlichen Horde unterordnen, die ohne Sinn und Verstand war. Er war kein Herdentier - er war ein Mensch, und er stand allein. Ayn Rands Klassiker über die finstere Zukunft des großen "Wir", wo Individuen keinen Namen, keine Unabhängigkeit und keinen Wert haben, ist der Vorlauf zu ihren späteren Meisterwerken "Der Ursprung" und "Der Streik".

I Glanced Out the Window and Saw the Edge of the World Jul 27 2019 This book is about WAR--not the causes and results, not the planning and the campaigns, not the artillery and the bombs. It is about the heinous crimes committed by the combatants, the horrifying experiences of civilians, the devastation of cities and villages, the killing and the dying, the glory leading to revulsion and guilt, and the assimilation of suffering that either ends in death or in the triumph of the soul. It looks at the struggle of the church to remain faithful and the servants of the church who seek to bring sense and solace to the victims. It discusses antisemitism, racism, and war itself from biblical perspectives. It reveals the unjustifiable reasons for engaging in war and how this brings catastrophic results for all peoples--the mental instability of the survivors and the loss and grief of those on the home front. In war, how can men and women carry out the actions that they do? As Viktor Frankl writes: "After all, man is that being who has invented the gas chambers of Auschwitz; however, he is also that being who has entered those gas chambers upright, with the Lord's Prayer or the Shema Yisrael on his lips."

Global Negotiation Jul 07 2020 Each year American executives make nearly eight million trips overseas for international business. In the process, they leave billions of dollars on the negotiation table. Global Negotiation provides critical tools to help businesspeople save money (and face) when negotiating across cultural divides. Drawing on their more than 50 combined years of experience, as well as extensive field research with over 2000 business people in 21 different cultures, John L. Graham and William Hernández Requejo have discovered how to create long-lasting commercial relationships around the world. The authors provide a rare combination of practical insight and illuminating anecdotes, and offer examples from well-known companies such as Toyota, Ford, Intel, AT&T, Rockwell, Boeing, and Wal-Mart.
