**Biotechnological Innovations for Environmental Bioremediation** Dec 03 2019 This edited book focuses on the application and implementation of bioremediation and other strategies to create a sustainable and healthy environment. It provides a collection of approaches to environmental biotechnology for wastewater treatment, removal of soil heavy metals, degradation of pesticides, removal of dyes, waste management, and microbial conversion of environmental pollutants. This book brings to the fore contributions of certain globally important environmental biotechnologist. Bioremediation is a popular branch of biotechnology that involves the use of living organisms such as microorganisms (microbial remediation), bacteria, fungus (mycoremediation), and plants (phytoremediation) to bind, extract, and clean up contaminants, pollutants, and toxins from soil, groundwater, and other environments. This book is of interest to researchers, scientists, and academic faculty in environmental sciences. Also, it serves as additional reading and reference material for undergraduate and graduate students as well as postdocs in environmental, agriculture, ecology, and soil sciences. National and International policy makers will also find valuable information from this book.

**Multilingualism and Language Diversity in Urban Areas** Oct 13 2020 This state-of-the-art volume provides an interdisciplinary overview of current topics and research foci in the areas of linguistic diversity and migration-induced multilingualism and aims to lay the foundations for interdisciplinary work and the development of a common methodological framework for the field. Linguistic diversity and migration-induced multilingualism are complex, multi-faceted phenomena that need to be studied from different, complementary perspectives. The volume comprises a

total of fourteen contributions from linguistic, educationist, and urban sociological perspectives and highlights the areas of language acquisition, contact and change, multilingual identities, urban spaces, and education. Linguistic diversity can be framed as a result of current processes of migration and globalization. As such the topic of the present volume addresses both a general audience interested in migration and globalization on a more general level, and a more specialized audience interested in the linguistic repercussions of these large-scale societal developments.

*Structural Analysis, Si Edition* Oct 05 2022 Master the basic principles of structural analysis using the classical approach found in Kassimali's distinctive STRUCTURAL ANALYSIS, SI Edition, 6th Edition. This edition presents concepts in a logical order, progressing from an introduction of each topic to an analysis of statically determinate beams, trusses and rigid frames, and then to the analysis of statically indeterminate structures. Practical, solved problems integrated throughout the presentation help illustrate and clarify the book's fundamental concepts, while the latest examples and timely content reflect today's most current professional standards. For further support, you can download accompanying interactive software for analyzing plane framed structures from this edition's companion website. Trust Kassimali's STRUCTURAL ANALYSIS, SI Edition, 6th Edition for the tools and knowledge you need for advanced study and professional success.

*Structural Analysis* Nov 06 2022 The 5th edition of the classic STRUCTURAL ANALYSIS by Aslam Kassamali teaches students the basic principles of structural analysis using the classical approach. The chapters are presented in a logical order, moving from an introduction of the topic to an analysis of statically determinate beams, trusses and rigid frames, to the analysis of statistically indeterminate structures. The text includes solved problems to help illustrate the fundamental concepts. Access to interactive software for analyzing plane framed structures is available for download via the text's companion website. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Shooters Jan 16 2021 The last days of the 20th Century saw a major crackdown on Manchester's warring gangs. But soon new groups emerged, with names like the Young Gooch Crew, the Moss Side Bloods, the Old Trafford Crips, the Longsight Street Soldiers and the Fallowfield Mad Dogs. Younger and even more violent than their predecessors, they baited their rivals with explicit grime tracks and internet videos and unleashed a wave of bloodshed. SHOOTERS tells the story of these gangs and their various alliances, feuds and crimes. Using detailed court testimony and inside accounts, it gives a rare insight into the lethal conflict between the Pitt Bulls and the Longsight Crew; tells how two underworld armourers dubbed Bobby the Gun and the Merchant of Death supplied the gunmen with reactivated weapons; chronicles the infamous bloodbath at the Brass Handles pub in Salford, when two would-be assassins were themselves executed; and reveals the inner workings of the drug-dealing L\$\$ posse. It also recounts the story of Gooch leaders Colin Joyce and Stephen Amos, whose arrest for murder led to one of Britain's biggest-ever trials; pieces together the events behind the notorious killings of teenagers such as Jessie James, Giuseppe Gregory and Louis Brathwaite; examines the methods of the audacious armed robbers of Salford; and describes the rise of lethal Asian gangs and their influence in the neighbouring towns of Bolton and Oldham. SHOOTERS is a powerful account of one city's ongoing struggle with the law of the gun.

Grouping Multidimensional Data Aug 30 2019 Clustering is one of the most fundamental and essential data analysis techniques. Clustering can be used as an independent data mining task to discern intrinsic characteristics of data, or as a preprocessing step with the clustering results then used for classification, correlation analysis, or anomaly detection. Kogan and his co-editors have put together recent advances in clustering large and high-dimension data. Their volume addresses new topics and methods which are central to modern data analysis, with particular emphasis on linear algebra tools, optimization methods and statistical techniques. The contributions, written by leading researchers from both academia and industry, cover theoretical basics as well as application and evaluation of algorithms, and thus provide an excellent state-of-the-art overview. The level of

detail, the breadth of coverage, and the comprehensive bibliography make this book a perfect fit for researchers and graduate students in data mining and in many other important related application areas.

**Ridge Fuzzy Regression Modelling for Solving Multicollinearity** Mar 18 2021 This paper proposes an a-level estimation algorithm for ridge fuzzy regression modeling, addressing the multicollinearity phenomenon in the fuzzy linear regression setting.

**Studyguide for Structural Analysis by Kassimali, Aslam** Jul 02 2022 Never HIGHLIGHT a Book Again Includes all testable terms, concepts, persons, places, and events. Cram101 Just the FACTS101 studyguides gives all of the outlines, highlights, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanies: 9780872893795. This item is printed on demand.

*Journal of Natural Geometry* Mar 06 2020

**Structural Analysis (with CD-ROM)** Dec 15 2020 The first two editions of Structural Analysis were distinguished by the clarity and quality of the explanations of the basic concepts supported by detailed step-by-step procedures for analysis and worked-out examples. The Third Edition builds on this foundation with 30% more (new) examples and about 40% new problems to increase the total number to over 600 problems. The coverage of loads on structures is updated to meet the latest ASCE Standards, and the treatment of the force method has been expanded by including the topic of Three-Moment Equation. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Shock Waves Science and Technology Library, Vol. 6** May 20 2021 This book, as a volume of the Shock Wave Science and Technology Reference Library, is primarily concerned with the fundamental theory of detonation physics in gaseous and condensed phase reactive media. The detonation process involves complex chemical reaction and fluid dynamics, accompanied by intricate effects of heat, light, electricity and magnetism - a contemporary research field that has found wide applications in propulsion and power, hazard prevention as well as military engineering. The seven extensive chapters contained in this volume are: - Chemical Equilibrium Detonation (S Bastea and LE Fried) - Steady One-Dimensional Detonations (A Higgins) - Detonation Instability (HD Ng and F Zhang) - Dynamic Parameters of Detonation (AA Vasiliev) - Multi-Scaled Cellular Detonation (D Desbordes and HN Presles) - Condensed Matter Detonation: Theory and Practice (C Tarver) - Theory of Detonation Shock Dynamics (JB Bdzil and DS Stewart) The chapters are thematically interrelated in a systematic descriptive approach, though, each chapter is self-contained and can be read independently from the others. It offers a timely reference of theoretical detonation physics for graduate students as well as professional scientists and engineers.

**Lead Exposure in Children** Nov 25 2021

Role of Nutrigenomics in Modern-day Healthcare and Drug Discovery Mar 30 2022 Role of Nutrigenomics in Modern-day Healthcare and Drug Discovery presents novel insights into how these tools can be applied in the study of nutrient-gene interaction for the management of certain disease conditions without using synthetic drugs or other treatments that come with side effects. Divided into three parts, Part I presents chapters that give background information of the subject while laying a framework for other chapters to follow. Part II presents chapters that discuss the role of nutrigenomics in healthcare, while Part III presents chapters that discuss the role of nutrigenomics in modern day drug discovery. Written by a global team of experts from key institutions around the world, this book is useful for drug developers, medicinal chemists, public health scientists, molecular biologists, biochemists, toxicologists and food scientists. Provides readers with background information on the role of nutrigenomics in healthcare, with a focus on emerging topics in nutrigenetics and nutrigenomics Presents chapters that discusses the role of nutrigenomics in the modern day drug discovery for the treatment and management of diseases Includes a wide array of definitions, methods, summaries, figures and

tables to aid readers with understanding and application

Advances in Manufacturing Technology XXXII Jul 30 2019 The urgent need to keep pace with the accelerating globalization of manufacturing in the 21st century has produced rapid advancements in technology, research and innovation. This book presents the proceedings of the 16th International Conference on Manufacturing Research incorporating the 33rd National Conference on Manufacturing Research (ICMR 2018), held in Skövde, Sweden, in September 2018. The aim of the conference is to create a friendly and inclusive environment, bringing together researchers, academics and industrialists with practical and theoretical knowledge to share and discuss emerging trends and new challenges. The book is divided into 12 parts, covering areas such as the manufacturing process; robots; product design and development; smart manufacturing; and lean, among others. Covering both cutting-edge research and recent industrial applications, the book will appeal to all those with an interest in recent advances in manufacturing technology.

*Kashmiri* Jan 04 2020 Kashmir boasts a language which challenges every field of linguistics. Kashmiri is spoken by approximately 3,000,000 people. Its syntax, similar to Germanic and other verb second languages, has raised many significant issues within current generative theories proposed by Chomsky and other prominent linguists.

*Advances in Information Retrieval* Oct 01 2019 rank, expert search and opinion detection.

**Rethinking Identities in Contemporary Pakistani Fiction** Nov 13 2020 This book focuses on the way that notions of home and identity have changed for Muslims as a result of international 'war on terror' rhetoric. It uniquely links the post-9/11 stereotyping of Muslims and Islam in the West to the roots of current jihadism and the resurgence of ethnocentrism within the subcontinent and beyond.

Neutrosophic Sets and Systems, Vol. 47, 2021 Jun 28 2019 Papers on neutrosophic statistics, neutrosophic probability, plithogenic set, paradoxism, neutrosophic set, NeutroAlgebra, etc. and their applications.

Structural Engineering and Geomechanics - Volume 1 Aug 23 2021 An understanding of dynamic effects on structures is critical to minimize losses from earthquakes and other hazards. These three books provide an overview of essential topics in structural and geotechnical engineering with an additional focus on related topics in earthquake engineering to enable readers gain such an understanding. One of the ultimate objectives of these books is to provide readers with insights into seismic analysis and design. However, in order to accomplish that objective, background material on structural and geotechnical engineering is necessary. Hence the first two sections of the book provide this background material followed by selected topics in earthquake engineering. The material is organized into three major parts. The first section covers topics in structural engineering. Beginning with fundamental mechanics of materials, the book includes chapters on linear and nonlinear analysis as well as topics on modeling of structures from different perspectives. In addition to traditional design of structural systems, introductions to important concepts in structural reliability and structural stability are discussed. Also covered are subjects of recent interest, viz., blast and impact effects on structures as well as the use of fiber reinforced polymer composites in structural applications. Given the growing interest in urban renewal, an interesting chapter on restoration of historic cities is also included. The second part of the book covers topics in geotechnical engineering, covering both shallow and deep foundations and issues and procedures for geotechnical modeling. The final part of the book focuses on earthquake engineering with emphasis on both structures and foundations. Here again, the material covered includes both traditional seismic design and innovative seismic protection. And more importantly, concepts in modeling for seismic analysis are highlighted.

*Die Goldene Legende* Oct 25 2021 Wenn ein Leben nur in der Lüge möglich ist In dem Moment, als auf der Grand Trunk Road Schüsse zu hören sind, beginnt Nargis' Leben zu zerbrechen. Ihr Ehemann gelangt versehentlich ins Kreuzfeuer und stirbt, bevor sie ihm die Wahrheit über ihre

Vergangenheit beichten kann. Schon seit Längerem fürchtet sie, dass diese bald ans Licht kommen wird: Ein Unbekannter verkündet regelmäßig Geheimnisse der Anwohner vom Minarett der örtlichen Moscheen und versetzt damit Muslime und Christen gleichermaßen in Angst. Als die Lautsprecher die verbotene Liaison ihres Nachbarn mit der Tochter des muslimischen Geistlichen aufdecken, sind die Einschläge so nah, dass Nargis handeln muss ... In der für ihn typischen leuchtenden Prosa erzählt Nadeem Aslam eine Geschichte über Fanatismus, Widerstandsvermögen und die Lügen, die manchmal nötig sind, um zu überleben. Ein mutiger, zeitgemäßer und schmerzlich schöner Roman, in dem sich Pakistans Vergangenheit und Gegenwart spiegeln.

*Sturkie's Avian Physiology* Apr 18 2021 *Sturkie's Avian Physiology, Seventh Edition* is the classic, comprehensive, single volume on the physiology of domestic and wild birds. This latest edition is thoroughly revised and updated with several new chapters with entirely new content on such topics as vision, sensory taste, pain reception, evolution and domestication. Chapters throughout have been greatly expanded due to the many recent advances in the field. This book is written by international experts in different aspects of avian physiology. For easy reading and searches, the book is structured under a series of themes, beginning with genomic studies, sensory biology and nervous systems, and major organs. This book is an important resource for ornithologists, poultry scientists, and other researchers in avian studies. It is also useful for students in avian or poultry physiology, as well as avian veterinarians. Stands out as the only single volume devoted to bird physiology Features updates, revisions or additions to each chapter Written and edited by international leaders in avian studies

[Index Medicus](#) Jul 10 2020

**Testing and Inspection Using Acceptance Sampling Plans** Jun 20 2021 This book introduces a number of new sampling plans, such as time truncated life tests, skip sampling plans, resubmitted plans, mixed sampling plans, sampling plans based on the process capability index and plans for big data, which can be used for testing and inspecting products, from the raw-materials stage to the final product, in every industry using statistical process control techniques. It also presents the statistical theory, methodology and applications of acceptance sampling from truncated life tests. Further, it discusses the latest reliability, quality and risk analysis methods based on acceptance sampling from truncated life, which engineering and statisticians require in order to make decisions, and which are also useful for researchers in the areas of quality control, lifetime analysis, censored data analysis, goodness-of-fit and statistical software applications. In its nine chapters, the book addresses a wide range of testing/inspection sampling schemes for discrete and continuous data collected in various production processes. It includes a chapter on sampling plans for big data and offers several illustrative examples of the procedures presented. Requiring a basic knowledge of probability distributions, inference and estimation, and lifetime and quality analysis, it is a valuable resource for graduate and senior undergraduate engineering students, and practicing engineers, more specifically it is useful for quality engineers, reliability engineers, consultants, black belts, master black belts, students and researchers interested in applying reliability and risk and quality methods.

*Matrix Analysis of Structures* Jan 28 2022 Develop an understanding of the matrix method of structural analysis with the contemporary, reader-friendly approach found in Kassimali's *MATRIX ANALYSIS OF STRUCTURES*, 3rd Edition. Whether you are an advanced undergraduate or graduate student, this edition serves as an excellent resource for understanding all key aspects of the matrix method of structural analysis. Unlike traditional books that are difficult to read, this edition provides understandable, clear explanations of concepts with updated photographs and diagrams as well as flowcharts. Step-by-step procedures guide you through analysis while updated, intriguing examples clarify concepts. New and current exercises include problems working with practical, real-world structures to give you meaningful practice. Trust this technically and mathematically accurate presentation to provide the foundation you need in matrix structural analysis.

*Developing Relationships, Personalization, and Data Herald in Marketing 5.0* Nov 01 2019 Within the past decade, marketing has experienced three major challenges: generation gap, prosperity polarization, and digital divide. The disconnect between older corporate executives and their younger managers and customers has proven to be a significant challenge. Digitalization brings fear of the unknown with the threats of job loss and privacy concerns. However, it also brings the promise of exponential growth and better living for humanity. Businesses must break the divide to ensure that technological advancement will move forward and not be welcomed with resentment. *Developing Relationships, Personalization, and Data Herald in Marketing 5.0* contrasts the advantages and disadvantages of modern marketing over traditional marketing and focuses on identifying how companies and society can be benefited by the technological advancement of marketing. Covering topics such as customer engagement, neuromarketing, and review rating prediction, this premier reference source is an essential resource for business leaders, marketing professionals, students and educators of higher education, university libraries, researchers, and academicians.

*Omics Approaches for Sugarcane Crop Improvement* Sep 11 2020 In this book, the information encompasses various researchable biotechnology aspects of sugarcane, its genomic structure, diversity, comparative and structural genomics, data mining, etc. This book explores both the theoretical and practical aspects of sugarcane crops, focusing on innovative processes. This book argues in favor of developing an integrated research and development system to strengthen the research and development capabilities of all the areas of sugarcane. Further, it covers the recent trends of sugarcane biotechnology, especially in the next-generation sequencing (NGS) era. This book will be very useful for professors and scientists who are working in the area of sugarcane crops by using molecular biology and bioinformatics. It is also useful for students to use as a reference for their classes or thesis projects. Key features: • Discusses an integral part of molecular biology and pivotal tools for molecular breeding; enables breeders to design cost-effective and efficient breeding strategies for sugarcane • Discusses the harnessing genomics technologies for genetic engineering and pathogen characterization and diagnosis of sugarcane • Provides new examples and problems, added where needed • Provides insight from contributors drawn from around the globe

**Education Outcomes and Poverty in the South** Jul 22 2021 This text arises out of a five year research programme examining the impact of education on the lives and livelihoods of people in developing countries. The book presents theoretical and empirical knowledge that will help to improve education and poverty reduction strategies in developing countries.

*Studyguide for Structural Analysis by Kassimali, Aslam, Isbn 9780534391683* Jun 01 2022 Never HIGHLIGHT a Book Again! Virtually all of the testable terms, concepts, persons, places, and events from the textbook are included. Cram101 Just the FACTS101 studyguides give all of the outlines, highlights, notes, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. **Advances in Nonlinear Variational Inequalities** Sep 23 2021

**Matrix Analysis of Structures SI Version** Sep 04 2022 This book takes a fresh, student-oriented approach to teaching the material covered in the senior- and first-year graduate-level matrix structural analysis course. Unlike traditional texts for this course that are difficult to read, Kassimali takes special care to provide understandable and exceptionally clear explanations of concepts, step-by-step procedures for analysis, flowcharts, and interesting and modern examples, producing a technically and mathematically accurate presentation of the subject. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

*Matrix Analysis of Structures, SI Edition* Apr 30 2022 Develop an understanding of the matrix method of structural analysis with the contemporary, reader-friendly approach found in Kassimali's MATRIX ANALYSIS OF STRUCTURES, SI, 3rd Edition. Whether you are an advanced undergraduate or

graduate student, this edition serves as an excellent resource for understanding all key aspects of the matrix method of structural analysis. Unlike traditional books that are difficult to read, this edition provides understandable, clear explanations of concepts with updated photographs and diagrams as well as flowcharts. Step-by-step procedures guide you through analysis while updated, intriguing examples clarify concepts. New and current exercises include problems working with practical, real-world structures to give you meaningful practice. Trust this technically and mathematically accurate presentation to provide the foundation you need in matrix structural analysis.

Nuclear Science Abstracts May 08 2020

**Omics in Horticultural Crops** Feb 03 2020 Omics in Horticulture Crops presents a comprehensive view of germplasm diversity, genetic evolution, genomics, proteomics and transcriptomics of fruit crops (temperate, tropical and subtropical fruits, fruit nuts, berries), vegetables, tuberous crops, ornamental and floricultural crops and medicinal aromatic plants. Information covering phenomics, genetic diversity, phylogenetic studies, genome sequencing, and genome barcoding through the utilization of molecular markers plays an imperative role in the characterization and effective utilization of diverse germplasm are included in the book. This is a valuable reference for researchers and academics seeking to improve cultivar productivity through enhanced genetic diversity while also retaining optimal traits and protecting the growing environment. Highlights perspectives, progress and promises of -omics application Provides a systematic overview of origin, progenitor and domestication process as well as genetic insights Includes full range of horticultural crops

**Metabolic Consequences of Malnutrition: How to Balance Nutrients and Genes** Apr 06 2020

*Cumulated Index Medicus* Aug 11 2020

**Neutrosophic Sets and Systems Book Series, Vol. 30, 2019** Jun 08 2020 "Neutrosophic Sets and Systems" has been created for publications on advanced studies in neutrosophy, neutrosophic set, neutrosophic logic, neutrosophic probability, neutrosophic statistics that started in 1995 and their applications in any field, such as the neutrosophic structures developed in algebra, geometry, topology, etc.

**A New X-Bar Control Chart for Using Neutrosophic Exponentially Weighted Moving Average** Dec 27 2021 The existing Shewhart X-bar control charts using the exponentially weighted moving average statistic are designed under the assumption that all observations are precise, determined, and known. In practice, it may be possible that the sample or the population observations are imprecise or fuzzy. In this paper, we present the designing of the X-bar control chart under the symmetry property of normal distribution using the neutrosophic exponentially weighted moving average statistics. We will first introduce the neutrosophic exponentially weighted moving average statistic, and then use it to design the X-bar control chart for monitoring the data under an uncertainty environment. We will determine the neutrosophic average run length using the neutrosophic Monte Carlo simulation. The efficiency of the proposed plan will be compared with existing control charts.

**New Zealand Journal of Mathematics** Feb 14 2021

**Rough Set and Knowledge Technology** Feb 26 2022 This book constitutes the refereed proceedings of the 5th International Conference on Rough Set and Knowledge Technology, RSKT 2010, held in Beijing, China, in October 2010. The 98 revised full papers presented were carefully reviewed and selected from 175 initial submissions. The papers are organized in topical sections on rough sets and computing theory, fuzzy sets, knowledge

technology, intelligent information processing, health informatics and biometrics authentication, neural networks, complex networks, granular computing, metaheuristic, cloud model and its application, data mining in cloud computing, decision-theoretic rough set model, and quotient space theory research and application.
