*Advances in Building Technology May 21 2021 This set of proceedings is based on the International Conference on Advances in Building Technology in Hong Kong on 4-6 December 2002. The two volumes of proceedings contain 9 invited keynote papers, 72 papers delivered by 11 teams, and 133 contributed papers from over 20 countries around the world. The papers cover a wide spectrum of topics across the three technology sub-themes of structures and construction, environment, and information technology. The*

variety within these categories spans a width of topics, and these proceedings provide readers with a good general overview of recent advances in building research.

*A Cello Christmas* Aug 24 2021 *A Cello Christmas* contains Christmas and Holiday tunes from a wide variety of sources. Old English, French, German, Austrian, Irish, American, and Ukrainian carols are included alongside the traditional hymn carols. All these melodies are arranged for cello solo and have suggested bowings, guitar chords, piano accompaniment, and background information. A second cello part included with each tune makes this a useful cello duet book. The collection is a great resource of traditional Christmas music for cellists.

*Advances in Intelligent Networking and Collaborative Systems* Oct 26 2021 The aim of this book is to provide the latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to intelligent social networks and collaborative systems, intelligent networking systems, mobile collaborative systems, secure intelligent cloud systems, etc., and to reveal synergies among various paradigms in the multi-disciplinary field of intelligent collaborative systems. It presents the Proceedings of the 9th International Conference on Intelligent Networking and Collaborative Systems (INCoS-2017), held on August 24-26, 2017 in Toronto, Canada. With the rapid evolution of the Internet, we are currently experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm that puts people at the very centre of networks and exploits the value of people's connections, relations and collaborations. Social networks are also playing a major role in the dynamics and structure of intelligent Web-based networking and collaborative systems. Virtual campuses, virtual communities and organizations effectively leverage intelligent networking and collaborative systems by tapping into a broad range of formal and informal electronic relations, such as business-to-business, peer-to-peer and many types of online collaborative learning interactions, including the emerging e-learning systems. This has resulted in entangled systems that need to be managed efficiently and autonomously. In addition, the latest and powerful technologies based on Grid and wireless infrastructure as well as Cloud computing are now greatly enhancing collaborative and networking applications, but are also facing new issues and challenges. The principal objective of the research and development community is to stimulate research that leads to the creation of responsive environments for networking and, in the longer-term, the development of adaptive, secure, mobile, and intuitive intelligent systems for collaborative work and learning.

*Ptolemy Harmonics May 01 2022 This translation of Ptolemy's influential treatise on musical and cosmic harmony faithfully reproduces Ptolemy's style and includes all the charts from the manuscript tradition. The commentary offers full exegesis of the text, loci paralleli, and citations of modern scholarly sources.*

*Postbop Jazz in the 1960s Jul 23 2021 Innovations in postbop jazz compositions of the 1960s occurred in several dimensions, including harmony, form, and melody. Postbop jazz composers such as Wayne Shorter, Herbie Hancock, and Chick Corea broke with earlier tonal jazz traditions. Their compositions marked a departure from the techniques of jazz standards and original compositions that defined small-group repertory through the 1950s: single-key orientation, schematic 32-bar frameworks (in AABA or ABAC forms), and tonal harmonic progressions. The book develops analytical pathways through a number of compositions, including "El Gaucho," "Penelope," "Pinocchio," "Face of the Deep" (Shorter); "King Cobra," "Dolphin Dance," "Jessica" (Hancock); "Windows," "Inner Space," "Song of the Wind" (Corea); as well as "We Speak" (Little); "Punjab" (Henderson); "Beyond All Limits" (Shaw). These case studies offer ways to understand their harmonic syntax, melodic and formal designs, and general principles of harmonic substitution. By locating points of contact among these postbop techniques-and by describing their evolution from previous tonal jazz practices-the book illustrates the syntactic changes that emerged during the 1960s.*

*Everything in its Right Place Jan 29 2022 More than any rock artist since The Beatles, Radiohead's music inhabits the sweet spot between two extremes: on the one hand, music that is wholly conventional and conforms to all expectations of established rock styles, and, on the other hand, music so radically experimental that it thwarts any learned notions. While averting mainstream trends but still achieving a significant level of success in both US and UK charts, Radiohead's music includes many surprises and subverted expectations, yet remains accessible within a framework of music traditions. In Everything in its Right Place: Analyzing Radiohead, Brad Osborn reveals the functioning of this reconciliation of extremes in various aspects of Radiohead's music, analyzing the unexpected shifts in song structure, the deformation of standard 4/4 backbeats, the digital manipulation of familiar rock 'n' roll instrumentation, and the expected resolutions of traditional cadence structures. Expanding on recent work in musical perception, focusing particularly on form, rhythm and meter, timbre, and harmony, Everything in its Right Place treats Radiohead's recordings as rich sonic ecosystems in which a listener participates in an individual search for meaning, bringing along expectations learned from popular music, classical music, or even Radiohead's own compositional idiolect. Radiohead's violations of these subjective expectation-realization chains prompt the listener to search more deeply for meaning within corresponding lyrics, biographical details of the band, or intertextual relationships with music, literature, or film. Synthesizing insights from a range of new*

*methodologies in the theory of pop and rock, and specifically designed for integration into music theory courses for upper level undergraduates, Everything in its Right Place is sure to find wide readership among scholars and students, as well as avid listeners who seek a deeper understanding of Radiohead's distinctive juxtapositional style.*

*Marine Insurance Nov 14 2020 This authoritative work forms a comprehensive examination of the legal and historical context of marine insurance, providing a detailed overview of the events and factors leading to its codification in the Marine Insurance Act 1906. It investigates the development of the legal principles and case law that underpin the Act to reveal how successful this codification truly was, and to demonstrate how these historical precedents remain relevant to marine insurance law to this day.*
