[Langstroth's Hive and the Honey-Bee](#) May 18 2021 This influential guide by "the father of modern beekeeping," originally published in 1853, constitutes the first descriptive treatise of modern bee management. Its innovations allowed people to engage in actual beekeeping, rather than simply handling bee domiciles and extracting the honey. The techniques it explains and illustrates are still employed 150 years later—including the author's patented invention, a movable frame hive. In a reader-friendly, enthusiastic style, Langstroth addresses every aspect of beekeeping: bee physiology; diseases and enemies of bees; the life-cycles of the queen, drone, and worker; bee-hives; the handling of bees; and many other topics. Unabridged republication of the classic 1878 (fourth) edition.--Publisher description.

[Backpacker](#) Jan 02 2020 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

[Spy](#) May 06 2020 Smart. Funny. Fearless."It's pretty safe to say that Spy was the most influential magazine of the 1980s. It might have remade New York's cultural landscape; it definitely changed the whole tone of magazine journalism. It was cruel, brilliant, beautifully written and perfectly designed, and feared by all. There's no magazine I know of that's so continually referenced, held up as a benchmark, and whose demise is so lamented" --Dave Eggers. "It's a piece of garbage!" --Donald Trump.

[DHM2020](#) Aug 09 2020 Digital human modeling (DHM) is an active field of research directed towards the goal of creating detailed digital models of the human body and its functions, as well as assessment methods for evaluating human interaction with products and production systems. These have many applications in ergonomics, design and engineering, in fields as diverse as the automotive industry and medicine. This book presents the proceedings of the 6th International Digital Human Modeling Symposium (DHM2020), held in Skövde, Sweden from 31 August to 2 September 2020. The conference was also accessible online for those unable to attend in person because of restrictions due to the Covid-19 pandemic. The symposium provides an international forum for researchers, developers and users to report their latest innovations, summarize new developments and experiences within the field, and exchange ideas, results and visions in all areas of DHM research and applications. The book contains the 43 papers accepted for presentation at the conference, and is divided into 6 sections which broadly reflect the topics covered: anthropometry; behavior and biomechanical modeling; human motion data collection and modeling; human-product interaction modeling; industry and user perspectives; and production planning and ergonomics evaluation. Providing a state-of-the-art overview of research and developments in digital human modeling, the book will be of interest to all those who are active in the field.

[SPIN](#) Aug 28 2019 From the concert stage to the dressing room, from the recording studio to the digital realm, SPIN surveys the modern musical landscape and the culture around it with authoritative reporting, provocative interviews, and a discerning critical ear. With dynamic photography, bold graphic design, and informed irreverence, the pages of SPIN pulsate with the energy of today's most innovative sounds. Whether covering what's new or what's next, SPIN is your monthly VIP pass to all that rocks.

[High-Speed-Photography](#) Jan 26 2022 - Impressive images with breathtaking colour effects - Various drop shapes, colour explosions and ballistic shootings - Detailed information on required equipment and the assembly of the sets High-speed photography captures moments which the human eye barely perceives. Fractions of seconds, in which a water drop strikes or a light bulb explodes. Daniel Nimmervoll shows in this updated and expanded edition how you can freeze these dynamic moments with the help of your camera and produce proper artwork. First, he reveals how you can take water drop photos with the simplest means and without equipment. Then, he goes into detail with professional equipment and explains which preparations are necessary for various shootings. He deals with topics such as lighting, control units, solenoid valves, different drop liquids, the shutter delay of the camera and gives an insight into his workflow of image editing as well as reproducibility of the drop shapes. This new edition has also been expanded to cover the topics Water Wigs, special nozzles with a plastic-based 3D printing process as well as special UV flashes with fluorescent colours. The setups and settings, but above all timings, become trickier with each shooting, but the recording technique leaves plenty of room for experiments which lead to spectacular results. Let your creativity run wild! Various drop shapes, colour explosions, Aqua Splashes and ballistics shootings, this book offers you a complete coverage of high speed photography. Includes: - Basic principles - Equipment: Camera and lens, controllers, solenoid valves and nozzles, water basin, DIY wood structure - Lighting: Flashes, light shapers, colours gels - Drop liquids: Water, guar gum, Nutflis Clear, glycerine, milk and many more - Setups and drop shapes: Reflections, 3-valve technique, Double Pillars, Jelly Fish, Crowns, Fountains ... - Reproducibility - Nozzles out of the 3D printer - UV flashes with fluorescent colours - Water Wigs - qua Splash - Ballistics shooting - Image editing - Excursus: High-speed video camera
