[Conversation Analytic Perspectives on English Language Learning, Teaching and Testing in Global Contexts](#) Jan 28 2022 This edited volume brings together 10 cutting-edge empirical studies on the realities of English language learning, teaching and testing in a wide range of global contexts where English is an additional language. It covers three themes: learners' development of interactional competence, the organization of teaching and testing practices, and sociocultural and ideological forces that may impact classroom interaction. With a decided focus on English-as-a-Foreign-Language contexts, the studies involve varied learner populations, from children to young adults to adults, in different learning environments around the world. The insights gained will be of interest to EFL professionals, as well as teacher trainers, policymakers and researchers.

[Rubric Nation](#) Feb 14 2021 What is a rubric and how are they being used in teacher education and evaluation? When did rubrics become ubiquitous in the field of education? What impact do rubrics have on students, teachers, teacher educators, and the educational enterprise? This book is an edited volume of essays that critically examine the phenomenon of rubrics in teacher education, evaluation and education more broadly. Rubrics have seen a dramatic rise in use and presence over the past twenty-five years in colleges of education and districts across the country. Although there is a wealth of literature about how to make rubrics, there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education. The chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education. Since rubrics have become indelible in education, it is necessary for a fuller, nuanced discussion of the phenomenon. Creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool. This book is not meant to be a series of chapters dedicated to best practices for creating rubrics, nor is this text meant to present all sides of the rubric discussion. Rather, this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature.

The Eleventh Trade Jun 20 2021 For fans of WONDER and REFUGEE BOY - meet Sami, a twelve-year-old refugee from Afghanistan, as he searches for friendship, a place to call home and his grandfather's most prized possession. Back in Afghanistan, before the Taliban came, Sami's grandfather was a famous musician. People would come from miles around and pay thousands to hear him play the rebab. Now Sami and his grandfather are refugees living in Boston. The rebab is their most valuable possession and a reminder of home. Then one terrible day, the rebab is stolen. Sam's grandfather is devastated. His last link with home is gone and with it, his livelihood. Sami resolves to get the rebab back as a surprise for Eid. When he finds it on ebay, with a hefty price tag attached, he begins to trade the few possessions he has - and as he does, he finds, to his surprise, that there are all kinds of people willing to help.

Teachers Under Attack Aug 03 2022 Never in the history of the United States have teachers and public schools undergone so much criticism. New Jersey Governor Chris Christie has been its poster boy for his scathing attacks on public school teachers and their union. Christie's personal vendetta against the NJEA and his proposed reforms will radically change public education and not for the better. In Teachers Under Attack! retired teacher Mike Spina torpedoes Christie's proposals by demonstrating education experts have proved them ineffective. Spina compiles all the arguments teachers can use to refute the Governor's misstatements and shows the public they are being duped so Christie can achieve his political agenda of privatizing public schools.

Teaching and Learning Difficulties 2nd ed. Aug 11 2020 The 2nd edition of Peter Westwood's best-selling Teaching and Learning Difficulties addresses recent initiatives around effective teaching, the greater focus on teaching standards, and the increasing importance of teachers' level of expertise and depth of subject knowledge. It presents evidence-based methods for teaching, aligned with the Australian Curriculum, and references the most recent policies, practices and research literature on effective teaching strategies and approaches. Teaching and Learning Difficulties provides guidance on teaching students that encounter difficulties in a number of learning areas, including science, social studies, history, geography and environmental education. Using a cross-curricular perspective, it explores multiple teacher-directed and student-centred instructional approaches for classroom use, highlighting the strengths, weaknesses and specific aspects of each one. It also examines the impact of classroom interactions that influence learning, suggests strategies for reducing learning failure and enhancing students' progress, and presents a 'big picture' perspective on teaching and learning difficulties. In the Learning Difficulties series, Peter Westwood evaluates, summarises and presents research, strategies and best-practice methodologies for working with students that have learning difficulties in particular subject areas. Rigorous yet accessible, the titles in this series provide teachers with the knowledge, data and direction they need to develop their skills and meet student needs.

Understanding Multimodal Discourses in English Language Teaching Textbooks Apr 30 2022 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.
