[Law-Making and Legitimacy in International Humanitarian Law](#) Jan 10

2021 International Humanitarian Law (IHL) is in a state of some turbulence, as a result of, among other things, non-international armed conflicts, terrorist threats and the rise of new technologies. This incisive book observes that while states appear to be reluctant to act as agents of change, informal methods of law-making are flourishing. Illustrating that not only courts, but various non-state actors, push for legal developments, this timely work offers an insight into the causes of this somewhat ambivalent state of IHL by focusing attention on both the legitimacy of law-making processes and the actors involved.

[Constitutional implications of the Cabinet manual](#) Aug 05 2020 Whilst welcoming the motivation behind the Manual and the transparency it brings to the workings of Government, the Committee says that in practice the Manual may be treated as having greater authority than originally intended, particularly where its content extends beyond matters purely for the Executive. All the work of the Executive, including the Cabinet Manual, is subject to scrutiny by Parliament. The fact that the document is primarily directed at the Executive does not exempt it from this scrutiny. The Committee makes some practical suggestions for specific improvements to the text, focusing particularly on the chapters covering government formation and ministers and Parliament. The Committee also challenges some of the specific content of the draft: the failure to include the convention, acknowledged elsewhere by the Government, that Parliament should have the opportunity to debate decisions to commit troops to armed conflict; guidance on when a Prime Minister should resign following a hung Parliament. The Committee recommends that the House should hold a regular debate on the Manual. The Committee felt, despite dissatisfaction with parts of the original draft, there was no reason to delay production of an approved version. The new version need not be perfect as it will be subject to further review.

[Guide to Standard Floras of the World](#) Sep 25 2019 This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants. The second edition was

completely updated and expanded to take into account the substantial literature of the late twentieth century, and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions, with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras, and general principles and current trends, plus an appendix on bibliographic searching, a lexicon of serial abbreviations, and author and geographical indexes.
