Teachers' Work and Emotions Feb 14 2021 Being a teacher is often thought of as an emotionally fulfilling job, with many positive experiences in watching students grow and mature. However, as Tsang's research shows, there are plenty of negative emotional experiences in this line of work as well. Given the recent attention towards mental health and well-being, this book addresses these negative experiences and provides recommendations for dealing with them. Focusing on teachers in Hong Kong, Tsang investigates the social mechanisms that arouse such negative emotional experiences, otherwise known as caam2. He asserts that these feelings are socially constructed, and it is only by understanding the causes and feelings can we begin to improve teachers' emotional well-being and teaching quality. Using a theoretical framework based on a critical review and synthesis of five existing perspectives, including labor process perspective, school administration perspective, emotional labor perspective, social interaction perspective, and teacher identity perspective, Tsang does precisely that, exploring the social process of these emotional experiences and the interplay between teacher agency and social structure. These findings go a long way in ameliorating teacher experiences all over the world.

Practical Prescribing for Medical Students Mar 18 2021 Learning to prescribe is an essential part of medical training. Due to various high profile serious prescribing errors, the GMC have introduced stricter prescribing standards which medical students must meet in order to graduate. This book helps medical students learn the essentials of safe prescribing practice, and is aimed directly at their needs. It covers all the aspects of prescribing required by the GMC, including principles of prescribing, law and ethics, professional responsibilities, patient communication, at-risk groups, avoiding common errors and what to do when things go wrong. Key features: Directly linked to the prescribing competencies in the GMC's Tomorrow's Doctors and Good Practice in Prescribing Medicines Real-life prescribing case studies and scenarios relate the principles to actual practice and placement situations Activities throughout each chapter for testing prescribing knowledge and skills Test questions for the new Prescribing Skills Assessment to help students prepare and be confident that they

can pass.

UCL Hospitals Injectable Medicines Administration Guide Jan 28 2022 "I would definitely recommend this book to all staff with an interest and involvement in intravenous drug therapy." —The Pharmaceutical Journal "There is no doubt that nurses will find this small book useful. It should be available for consultation in any clinical area where drugs are administered to patients by the injectable routes." —Journal of Clinical Nursing The safe administration of injectable medicines is key to patient safety. The NPSA recognises the use of injectable medicines is a high risk activity and recommends written information about injectables to be available at the point of preparation. The UCL Hospitals Injectable Medicines Administration Guide is a practical, accessible guide covering many important aspects of administering medicines by injection. It provides clear, concise information on the preparation and administration of over 245 injectable medicines for adults, paediatrics and neonates. It is an essential resource for nurses and other healthcare professionals: it provides the key information and advice needed for the safe and effective administration of injectable medicines. The Guide's introductory section provides a concise yet comprehensive overview of injectable therapy, including the risks and benefits of IV administration, infusion devices, and pharmaceutical aspects of injectable therapy. For each drug the alphabetically tabulated monographs provide: A practical method of preparation and administration via the IV, IM and SC routes, with risk reduction in mind at every step Expert advice from the team of specialist pharmacists at UCLH to ensure safe and pragmatic use of each medicine Monitoring advice for the management of reactions that may occur during administration Y-site and syringe driver compatibility data Minimum infusion volume data for fluid restricted patients Extravasation warnings, pH, sodium content, displacement values, stability and flush data New to this edition: 40 new monographs including recently marketed, unlicensed, rarely used and specialist medicines Detailed advice for the administration of high risk medicines such as heparin, with access to UCLH's medicine related guidelines at www.wiley.com/go/UCLH A colour-coded NPSA risk assessment for every mode of administration for every medicine, to highlight the safest method of administration A user guide and tutorial to give new readers confidence in using and understanding the Guide Revised chapters on administration methods and devices, aseptic non-touch technique, and latex allergy Fully revised and expanded Y-site compatibility section Spiral binding to allow the book to be left open at the relevant page The Guide is also available electronically at www.uclhguide.com.

Management's Guide to Effective Employment Interviewing Jun 08 2020 The intention of the manual is to provide an updated reference source for personnel professionals who want guidance on the legal implications and methodology of applied research as it relates to employment and hiring practices. Several steps are taken in personnel employment: 1) the position requirements and needed skills are determined; 2) a search is conducted within and outside the organization through position advertisement and recruitment procedures; 3) job applicants are assessed through application procedures, personal interviews, and tests; 4) the selected employee is notified, enrolled in benefit programs, and oriented to job and organization policies. Special attention must be given to laws relating to personnel selection. Employers should be aware of legislation that protects against discrimination for minorities, older persons, women, veterans, and handicapped persons. Personnel and employment interviewers must be unbiased with skills in interviewing, counseling, testing, and clerical perception.

Endbenutzersysteme Jul 10 2020 Die Datenverarbeitung hält Einzug auch in die Büros. Bereits heute kann man beobachten, wie nicht nur Programmierer, sondern auch Personen mit Funktionen, von denen man dies eigentlich nicht vermuten würde, Bildschirmgeräte oder sogar Rechner an ihren Arbeitsplätzen stehen haben und diese auch selbst bedienen. Eine weitere Entwicklungstendenz ist zu bemerken. Gehörte jemand vor wenigen Jahren bereits durch das Erlernen einer Programmiersprache zu den "Computer-Spezialisten", so bleibt diese teure Ausbildung heute vielfach nur noch den tatsächlichen Spezialisten vorbehalten. Für die eigentlichen Verbraucher der von einem Rechner erzeugten Informationen - und dies ist natürlich die große Mehrzahl der Mitarbeiter - ist der Computer ein Werkzeug neben anderen, das ihnen hilft, ihre Aufgaben zu erfüllen. Allerdings wird dieses Hilfsmittel auch nur dann eingesetzt und akzeptiert, wenn der zusatzliche Aufwand in einem ökonomischen Verhältnis zu der Qualität der erzielten Ergebnisse steht. Unter dem Eindruck tendenziell sinkender Preise beim technischen Gerät und steigender Aufwendungen für die Entwicklung" von Anwendungen versucht man einerseits, die Anwender direkt an ihrem Arbeitsplatz mit Rechenkapazität zu versorgen, und andererseits für die Kommunikation zwischen Mensch und Maschine benutzernahe, leicht zu erlernende und oft selbsterklärende Dialogformen zu finden. Mit diesen Ansprüchen werden viele Systeme auf dem Markt angeboten, aber fast ebenso oft kann man Fehlschläge bei deren Einsatz beobachten. Neben den psychologischen Faktoren sind dabei häufig Mängel in der Vorbereitung festzustellen. So wird z. B.
