The Silk Road Rediscovered Oct 05 2020 A roadmap for understanding the business challenges and opportunities in China By 2025, China and India will be two of the world's four largest economies. By then, economic ties between them should also rank among the ten most important bilateral ties worldwide. Their leaders are well aware of these emerging realities. In May 2013, just two months after taking charge, Premier Li Keqiang left for India on his first official trip outside China, a clear signal of China's foreign policy priorities. The Silk Road Rediscovered is the first book ever to analyze the growing corporate linkages between India and China. Did you know that: India's Mahindra is the fifth largest tractor manufacturer in China? Tata Motors' Jaguar Land Rover unit is the fastest growing luxury auto seller in China? India's NIIT is the most influential IT training brand in China? China's Huawei has its second largest R&D center in Bangalore and employs over 5000 people in India? Shanghai Electric earns its largest revenues outside China from India? As these developments illustrate, pioneering Indian and Chinese companies are rediscovering the fabled Silk Road which joined their nations in ancient times. Winning in each other's markets is also making them stronger and whetting their appetite for further global expansion. This book examines how Indian companies such as Tata Consultancy Services, Mahindra Tractors, NIIT, Tata Motors/Jaguar Land Rover and Sundaram Fasteners have figured out how to win in China. Their experiences may inspire and offer lessons to other Indian companies. The book also examines how Chinese pioneers such as Lenovo, Huawei, TBEA, Haier and Xinxing have made a strong commitment to India and are beginning to realize the fruits of this commitment. The key lessons that emerge from these analyses are: the odds of success go up dramatically when executives adopt a global rather than local-for-local perspective and are skillful at learning on the ground.

E-Mail Virus Protection Handbook Jul 14 2021 The E-mail Virus Protection Handbook is organised around specific e-mail clients, server environments, and anti-virus software. The first eight chapters are useful to both users and network professionals; later chapters deal with topics relevant mostly to professionals with an emphasis on how to use e-mail filtering software to monitor all incoming documents for malicious behaviour. A chapter on mobile code applications, which use Java applets and Active X controls to infect email and, ultimately, other applications and whole systems is presented. of sending unsolicited email to users. One spam attack can bring down an entire enterprise email system by sending thousands of bogus messages or "mailbombing," which can overload servers. Email spoofing means that users receive messages that appear to have originated from one user, but in actuality were sent from another user. Email spoofing can be used to trick users into sending sensitive information, such as passwords or account numbers, back to the spoofer. Highly topical! Recent events such as the LoveBug virus means the demand for security solutions has never been higher Focuses on specific safeguards and solutions that are readily available to users

Child Development: A Thematic Approach Aug 27 2022 Bukatko/Daehler's
CHILD DEVELOPMENT: A THEMATIC APPROACH provides a comprehensive, topically organized, up-to-date picture of development from conception to adolescence. Most important, it draws students' attention to the themes that replay themselves throughout the course of development, fundamental issues that resurface continually and that provide coherence to sometimes seemingly disparate research. The themes can serve as frameworks to help students further understand and remember the multitude of facts about child development. Bukatko/Daehler's sixth edition text draws on five themes, Nature and Nurture, Sociocultural Influence, Continuity/Discontinuity, Interaction among Domains, and Risk/Resilience. By drawing on these themes, the authors hope to stimulate readers to think about the process of development, or why it proceeds as it does. Through new For Your Review and Reflection sections, the authors also hope students will engage with the text and become more adept critical thinkers, who are more likely to appreciate the ramifications of theory and research for applied issues such as parenting practices, education, and social policy for children, which are ultimately concerns for us all.
